U.S. WORKS PROGRESS ADMINISTRATION

BIBLIOGRAPHY

OF

AERONAUTICS

Part 45 - Wind Tunnels and Laboratories

Compiled from the

INDEX OF AERONAUTICS

of the

INSTITUTE OF THE AERONAUTICAL SCIENCES

30 Rockefeller Plaza
New York City

The Index and Bibliographies have been prepared
by workers under the supervision of the
U.S. WORKS PROGRESS ADMINISTRATION
John R. Palmer
Managing Project Supervisor
Project 665-97-3-76

JULY
1939

FOREWORD

This bibliography is one of a series pertaining to aeronautics and is published by the U. S. Works Progress Administration with funds allotted to Project 665-97-3-76 for that purpose.

The project, sponsored by the New York City Department of Docks, receives the cooperation of the Institute of the Aeronautical Sciences which also directs the research and publishing staff workers.

Request for Additional References

The Institute of the Aeronautical Sciences invites corrections and criticism of the bibliographies and requests that additional references be forwarded to the Institute for inclusion in the final publications.

Distribution Requests

The bibliographies may not be sold. However, persons and organizations desiring copies may apply for them by letter, stating the use for which they are required. These requests will be considered in the order received. Should the supply be exhausted, such requests will receive first consideration when additional copies are published.

Robert R. Dexter
Aeronautical Engineer

Section I

BOOKS AND PAMPHLETS

Comparison of profile drag and boundary layer measurements obtained in flight and in full-scale wind tunnel, by Harry J. Goett and Joseph Bicknell. Washington, 1939. 10 p. diagrs., illus., tables. (N.A.C.A. Technical notes no. 693)

Experimental apparatus and methods of measurement. Fluid mechanics panel of the British A.R.C. and collaborators. (In Modern developments in fluid dynamics. London, Oxford university press, 1939. v. 1-2. chap. 6)

Investigations and tests in the towing basin at Guidonia, by G. Cremona. Washington, 1939. 19 p. diagrs., illus., tables. (N.A.C.A. Technical memorandums no. 892)

The Dornier wind tunnel, by H. Schlichting. Washington, 1938. 9 p. diagrs. (N.A.C.A. Technical memorandums no. 868) (From Luftfahrtforschung, München, Mar. 20, 1938, v. 15, no. 3, p. 95-100) (Review Aircraft engineering, London, June 1938, p. 193-98)

N.A.C.A. wind tunnels. (In Aircraft year book, 1938. New York, Aeronautical chamber of commerce, inc., 1938. p. 101-109, 406. illus.)

Untersuchungen und versuche im überschallwindkanal zu Guidonia, von A. Ferri. Zusatzband zum jahrbuch der D.V.L. Berlin, R. Oldenbourg, 1938. 30 p. illus.

Der Vergrösserte N.A.C.A. Schleppkanal und einiges über seine arbeitsweise, von Starr Truscott. (In Jahrbuch der deutschen luftfahrtforschung, ergänzungsband. München und Berlin, R. Oldenbourg, 1938. p. 374-395. diagrs., illus., tables)

Wind tunnel interference, by E.F. Relf. (In Handbook of aeronautics. London, Sir Isaac Pitman and sons, 1938. v. 1, p. 41-51. diagrs., tables.)

The Construction and calibration of the V.P.I. wind tunnel, by Norval White Conner. Blacksburg, Va., Virginia polytechnic institute, 1937. bibliog., diagrs., illus., tables. (Engineering experiment station bulletin, July 1937, v. 30, no. 9, p. 5-32)

The Development of a high speed induced wind tunnel of rectangular cross-section, by S.A. Wood and A. Bailey. London, H.M. Stat. off., 1937. 16 p. illus. (A.R.C. R. & M. no. 1791) (Abstract L'Aerotecnica, Roma, Dec. 1938, v. 18, no. 12)

WIND TUNNELS

Experimental investigation of wind-tunnel interference on the downwash behind an airfoil, by A. Silverstein and S. Katzoff. Washington, U.S. Govt. print. off., 1937. 7 p. bibliog., diagrs., illus. (N.A.C.A. Report no. 609)

Measurements of intensity and scale of wind-tunnel turbulences and their relation to the critical Reynolds number of spheres, by Hugh L. Dryden, G.B. Schubauer, W.C. Mock, Jr. and H.K. Skramstad. Washington, U.S. Govt. print. off., 1937. 31 p. illus. (N.A.C.A. Report no. 581) (Abstract Aircraft engineering, London, July 1937, v. 9, no. 101, p. 197)

25 jahre D.V.L., 1912-1937. Berlin-Adlershof, D.V.L., 1937. 76 p. illus.

Der Uberdruck - windkanal der Aerodynamischen versuchsanstalt Göttingen, von H. Winter. (In Jahrbuch der deutschen luftfahrtforschung. München und Berlin, R. Oldenbourg, 1937. p. 574-77. diagrs., illus.) (Also L'Aerotecnica, Roma, Dec. 1936, v. 16, no. 12, p. 970-75)

Wind tunnel experiment-nature of wind tunnel work, by Norman A.V. Piercy. (In his Aerodynamics. London, the English universities press, ltd., 1937. p. 64-94. diagrs., tables)

Boundary interference of partially closed wind tunnels, by K. Kondo. Tokyo, Tokyo imperial university, 1936. 130 p. diagrs. (Aeronautical research institute report no. 137) (Abstract Journal of the R.A.S., London, Sep. 1936, p. 71)

The 5-by-7 meter wind tunnel of the D.V.L., by M. Kramer. Washington, 1936. 10 p. illus. (N.A.C.A. Technical memorandums no. 788) (From Luftfahrtforschung, München und Berlin, Oct. 3, 1935, v. 12, no. 6, p. 181-87)

High-speed wind tunnels, by J. Ackeret. Washington, 1936. 22 p. (N.A.C.A. Technical memorandums no. 808) (From Reale accademia d'Italia, Roma, 1935. 55 p.)

Laboratoriumversuchstechnik, von E. von Angerer. Braunschweig, Vieweg und sohn, 1936. 201 p. illus.

Other world air powers (aircraft development in different countries; description of wind tunnels in England, France, Germany, Italy, etc. (In Aircraft year book, 1936. New York, Aeronautical chamber of commerce, inc., 1936. p. 33-60. illus.)

BOOKS AND PAMPHLETS

Notes on design of corners in duct system, by G.N. Patterson. London, H.M. Stat. off., 1936. 16 p. illus., tables. (A.R.C. R. & M. no. 1773)

Preliminary calibration of the 24-foot wind tunnel, R.A.E., with a short description of the tunnel, by W.G. Jennings, A. Terry and P.J. Pearsall. London, H.M. Stat. off., 1936. 9 p. illus. (A.R.C. R. & M. no. 1720)

Preliminary tests in the N.A.C.A. free-spinning wind tunnel, by C. H. Zimmerman. Washington, U.S. Govt. print. off., 1936. 18 p. diagrs., illus., tables. (N.A.C.A. Report no. 557) (Abstract Journal of the R.A.S., London, Jan. 1937, p. 24)

Scale effect and the wind tunnel, by Edward P. Warner. (In his Airplane design - performance. New York; London, McGraw-Hill book company, 1936. p. 24-27. diagrs., illus.)

Turbulence factors of N.A.C.A. wind tunnels as determined by sphere tests, by Robert C. Platt. Washington, U.S. Govt. print. off., 1936. 21 p. diagrs., illus., tables. (N.A.C.A. Report no. 558) (Abstract Journal of the R.A.S., London, Feb. 1937, p. 141)

Variable-density wind tunnel, Langley Field, by Bradley Jones. (In his Elements of practical aerodynamics. New York, John Wiley and sons, 1936. p. 21. illus.)

Wind tunnel tests. Types of wind tunnels, by Walter Stuart Diehl. (In his Engineering aerodynamics. New York, Ronald press company, 1936. p. 73-108. diagrs.)

The Aeronautical laboratory of the Stockholm technical institute, by Ivar Malmer. Washington, 1935. 17 p. diagrs., illus., tables. (N.A.C.A. Technical memorandums no. 766) (From Teknisk tidskrift supplement, Stockholm, Oct. 1933, v. 63, no. 10, p. 109-17)

Balance aérodynamique permettant le trace continu des polaires, par A. Lafay. Paris, E. Blondel La Rougery, 1935. diagrs. (Pub. scient. tech. Min. de l'air, no. 79, p. 1-6)

Contribution expérimentale à l'étude des souffleries supersoniques, par Lucien Santon. Paris, E. Blondel la Rougery, 1935. 87 p. diagrs., illus., tables. (Pub. scient. tech. Min. de l'air, no. 68)

The Denis-Gruson six-component wind-tunnel balance. Washington, 1935. 6 p. (N.A.C.A. Technical memorandums no. 772)

WIND TUNNELS

Effect of static pressure along the axis of an open jet tunnel of nozzle flare, by F.B. Bradfield and G. F. Midwood. London, H. M. Stat. off., 1935. 7 p. illus. (A.R.C. R. & M. no. 1695)

Experimental methods: - wind tunnels, by A. Toussaint and E. N. Jacobs. (In Aerodynamic theory, by William F. Durand. Berlin, Julius Springer, 1935. p. 251-350. diagrs.)

Pioneer wind tunnels, by N. H. Randers-Pehrson. Washington, The Smithsonian institution, 1935. 20 p. diagrs., illus., plates. (Smithsonian miscellaneous collections, v. 93, no. 4)

Principles of aerodynamical design of a wind tunnel nozzle, by G. Abramovitch. Moscow, Scientific technical department of the Supreme council of national economy, 1935. 19 p. (C.A.H.I. Transactions no. 231)

The 6-foot-4-inch wind tunnel at the Washington navy yard, by G. L. Desmond and J. A. McCrary. Washington, 1935. 13 p. illus. (N.A.C.A. Technical notes no. 536)

Two notes on the boundary influence of wind tunnels of circular cross section, by I. Tani and M. Taima. Tokyo, Tokyo imperial university, 1935. 27 p. diagrs. (Aeronautical research institute report no. 121)

Wind tunnel interference, by William F. Durand. (In his Aerodynamic theory. Berlin, Julius Springer, 1935. p. 296-301. diagrs., tables.)

Wind-tunnel interference with particular reference to off-center position of the wing, and to the down-wash at the tail, by Abe Silverstein and James A. White. Washington, U. S. Govt. print. off., 1935. 13 p. (N.A.C.A. Report no. 547)

The Aachen wind tunnel balance, by C. Wieselsberger. Washington, 1934. 4 p. (N.A.C.A. Technical memorandums no. 757) (From Abhandlungen aus dem Aerodynamischen institut an der Technischen hochschule, Aachen, no. 14. Berlin, Julius Springer, 1934)

Aerodynamics - wind tunnel interference, by E. F. Relf and F. C. Johansen. (In Handbook of aeronautics. London, Sir Isaac Pitman, 1934. p. 11, 108. diagrs., tables)

Experimental verification of the theory of wind-tunnel boundary interference, by Theodore Theodorsen and Abe Silverstein. Washington, U. S. Govt. print. off., 1934. 17 p. diagrs., illus., tables. (N.A.C.A. Report no. 478) (Abstract Journal of the R.A.S., London, Feb. 1935, p. 169)

BOOKS AND PAMPHLETS

The High speed tank of the Hamburg shipbuilding company, by G. Kempf and W. Sottorf. Washington, 1934. (N.A.C.A. Technical memorandums no. 735) (From Werft-reederei-hafen, Berlin, June 1, 1931)

The Small wind tunnel of the D.V.L., by F. Seewald. Washington, 1934. 8 p. (N.A.C.A. Technical memorandums no. 734) (From Z.F.M., Berlin, Oct. 28, 1933, v. 24, p. 559-62)

Turbulence tests of the R.A.E. wind tunnels, by R. G. Harris and A. Graham. London, H. M. Stat. off., 1934. 6 p. diagrs., tables. (A.R.C. R. & M. no. 1662)

Wall interference and depth effect in the R.A.E. seaplane tank and scale effect tests on hulls of three sizes, by L. P. Coombes, W. G. A. Perring, D. W. Bottle and L. Johnston. London, H. M. Stat. off., 1934. 30 p. diagrs., illus. (A.R.C. R. & M. no. 1649)

The Wave suppressors used in the N.A.C.A. tank, by Starr Truscott. Washington, 1934. 5 p. (N.A.C.A. Technical notes no. 513)

Wind tunnel wall interference on pitching moments of large models in Duplex tunnel, by W. L. Cowley and G. A. McMillan. London, H. M. Stat. off., 1934. 13 p. diagrs., tables. (A.R.C. R. & M. no. 1639) (Abstract Aero digest, New York, Jan. 1936, v. 28, no. 1, p. 67)

Wind tunnels, by A. C. Kermode. (In his An Introduction to aeronautical engineering. London, Sir Isaac Pitman and company, 1934. v. 1, p. 11-14. diagrs.)

Attaining a steady air stream in wind tunnels, by Ludwig Prandtl. Washington, 1933. 34 p. bibliog., diagrs., tables. (N.A.C.A. Technical memorandums no. 726) (From Handbuch der experimentalphysik, Leipzig, 1932, v. 4, pt. 2, p. 65-106)

Continuous rotation balance for measurement of yawing and rolling moments in a spin, by P. H. Allwork. London, H. M. Stat. off., 1933. 6 p. diagrs., illus. (A.R.C. R. & M. no. 1579)

Interference of a wind tunnel on a symmetrical body, by H. Glauert. London, H. M. Stat. off., 1933. 8 p. diagrs., tables. (A.R.C. R. & M. no. 1544)

Interference on an airfoil of finite span in an open rectangular wind tunnel, by Theodore Theodorsen. Washington, U. S. Govt. print. off., 1933. 4 p. (N.A.C.A. Report no. 461)

WIND TUNNELS

Methods of visualizing air flow with observations on several aerofoils in the wind tunnel, by K. W. Clark. London, H. M. Stat. off., 1933. 10 p. diagrs., illus. (A.R.C. R. & M. no. 1552)

The N.A.C.A. full-scale wind tunnel, by Smith J. De France. Washington, U.S. Govt. print. off., 1933. 10 p. diagrs., illus., plans. (N.A.C.A. Report no. 459) (Abstract Journal of the R.A.S., London, June 1934, p. 540)

The N.A.C.A. high-speed wind tunnel and tests of six propeller sections, by John Stack. Washington, U.S. Govt. print. off., 1933. 22 p. (N.A.C.A. Report no. 463)

The N.A.C.A. tank: a high speed towing basin for testing models of seaplane floats, by Starr Truscott. Washington, U. S. Govt. print. off., 1933. 16 p. (N.A.C.A. Report no. 470)

The N.P.L. open jet wind tunnel, by A. R. Collar. London, H. M. Stat. off., 1933. 17 p. diagrs. (A.R.C. R. & M. no. 1569)

Use of networks to introduce turbulence into a wind tunnel, by E. Ower and R. Warden. London, H. M. Stat. off., 1933. 8 p. diagrs. (A.R.C. R. & M. no. 1559)

Wind tunnel interference on wings, bodies and airscrews, by H. Glauert. London, H. M. Stat. off., 1933. 75 p. diagrs., tables. (A.R.C. R. & M. no. 1566)

Development of a high speed induced wind tunnel, by A. Bailey and S. A. Wood. London, H. M. Stat. off., 1932. 21 p. diagrs. (A.R.C. R. & M. no. 1468) (Abstract L'Aerotecnica, Roma, Apr. 1933, v. 13, no. 4, p. 433)

An Electromagnetic balance for force measurement or current control, by Fred S. Eastman. Seattle, University of Washington, 1932. 29 p. illus. (Engineering experiment station bulletin no. 60)

The Interference on the characteristics of an aerofoil in a wind tunnel of rectangular section, by H. Glauert. London, H. M. Stat. off., 1932. 7 p. diagrs., tables. (A.R.C. R. & M. no. 1459)

Investigation of open jet wind tunnels, by K. K. Baoulin. S. T. Astabatian and F. N. Krascheninnikov. Moscow, Scientific technical department of the Supreme council of national economy, 1932. 35 p. diagrs., illus. (C.A.H.I. Transactions no. 140)

BOOKS AND PAMPHLETS

The N.A.C.A. variable-density wind tunnel, by Eastman N. Jacobs and Ira H. Abbott. Washington, U. S. Govt. print. off., 1932. 12 p. diagrs., illus., tables. (N.A.C.A. Report no. 416)

Die Sechskomponenten-wage des grossen windkanals, Göttingen, von A. Betz. (In Ergebnisse der aerodynamischen versuchsanstalt zu Göttingen. München und Berlin, R. Oldenbourg, 1932. v. 4, p. 8-12. illus.)

The 7 by 10 foot wind tunnel of the N.A.C.A., by Thomas A. Harris. Washington, U. S. Govt. print. off., 1932. 9 p. diagrs., illus. (N.A.C.A. Report no. 412) (Abstract Journal of the R.A.S., London, Oct. 1932, p. 898)

Soufflerie aérodynamique à dynamomètres électrométriques du service des recherches de l'aéronautique, par P. Rebuffet. Paris, E. Blondel la Rougery, 1932. 123 p. diagrs., illus., tables. (Pub. scient. tech. Mind.de l'air no. 5) (Abstract Journal of the R.A.S., London, Jan. 1933, p. 94)

The Theory of wind-tunnel wall interference, by Theodore Theodorsen. Washington, U. S. Govt. print. off., 1932. 11 p. diagrs., tables. (N.A.C.A. Report no. 410) (Abstract Journal of the R.A.S., London, Oct. 1932, p. 898)

Venturi wind tunnel number I. Part II - Design, construction on tests of new tunnel propeller, by Frederick K. Kirsten and Robert C. Davis. Seattle, University of Washington, 1932. 26 p. diagrs., illus., tables. (Engineering experiment station bulletin no. 62)

The Wind tunnel, by Clifton Carroll Carter. (In his Simple aerodynamics and the airplane. New York, Ronald press company, 1932. p. 20-27, 105-08. illus.)

Wind tunnel boundary effects, by Elliott Gray Reid. (In his Applied wind theory. New York, McGraw-Hill book company, inc., 1932. p. 176-87. diagrs., tables.)

Wind tunnel interference on aerofoils, by H. Glauert. London, H. M. Stat. off., 1932. 11 p. diagrs., table. (A.R.C. R. & M. no. 1470)

Aerodynamics - wind tunnel interference, by E. F. Relf. (In Handbook of aeronautics. London, Gale and Polden, 1931. p. 142. diagrs., tables.)

WIND TUNNELS

Aeronautical education and research at the Swiss institute of technology in Zurich, by L. Larner and J. Ackeret. Washington, 1931. 8 p. illus. (N.A.C.A. Technical memorandums no. 616) (From Aéro-revue, Paris, Nov. 15, 1930)

Beschreibung des aerodynamischen instituts der Technischen hochschule, Aachen und seiner versuchseinrichtungen, von A.Gilles. (In Abhandlungen aus dem Aerodynamischen institut an der Technischen hochschule, Aachen, no. 10. Berlin, Julius Springer, 1931)

Experiments on models of a compressed air wind tunnel, by R. Jones and A. H. Bell. London, H. M. Stat. off., 1931. 22 p. diagrs., tables. (A.R.C. R. & M. no. 1355)

Flow of compressible fluid in the neighbourhood of the throat of a constriction in a circular wind channel, by S. G. Hooker. London, H. M. Stat. off., 1931. 9 p. diagrs., tables. (A.R.C. R. & M. no. 1429) (Also Proceedings of the Royal society of London, Mar. 1, 1932, v. 135, no. A827, p. 498-511) (Abstract Journal of the R.A.S., London, June 1932, p. 495)

An Integrating manometer for use in wind tunnel pressure distribution measurements, by Richard W. Noyes. Washington, 1931. 6 p. diagrs., plates, tables. (N.A.C.A. Technical notes no. 377) (Abstract L'Aerotecnica, Roma, Jan. 1932, v. 12, no. 1, p. 93)

The Interference on the characteristics of an aerofoil in a wind tunnel of circular section, by H. Glauert. London, H. M. Stat. off., 1931. 12 p. (A.R.C. R. & M. no. 1453)

Die Kälteanlage des D.V.L., von Georg Wollé. (In Jahrbuch der D.V.L. Berlin, R. Oldenbourg, 1931. p. 64-66. diagrs., illus.)

Nine-foot wind tunnel at New York university, by F. K. Teichman and B. F. Ruffner. Daniel Guggenheim school of aeronautics technical notes, New York, 1931, no. 1, p. 7-12. diagrs.

Reduction of turbulence in wind tunnels, by Hugh L. Dryden. Washington, U. S. Govt. print. off., 1931. 11 p. diagrs., illus., tables. (N.A.C.A. Report no. 392)

Theory of wind-tunnel wall interference, by Theodore Theodorsen. Washington, U. S. Govt. print. off., 1931. 11 p. diagrs., table. (N.A.C.A. Report no. 410)

BOOKS AND PAMPHLETS

Vacuum-tube control for electric wind-tunnel balances, by Fred S. Eastman. Seattle, University of Washington, 1931. 16 p. illus. (Engineering experiment station bulletin no. 35)

Ventilation of 24-ft. wind tunnel, by B. Lockspeiser. London, H. M. Stat. off., 1931. 10 p. diagrs. (A.R.C. R. & M. no. 1372) (Abstract L'Aerotecnica, Roma, Mar. 1932, v. 12, no. 3, p. 394)

Venturi wind tunnel number 1. Part I - Design, construction, calibration, by Frederick K. Kirsten, Harold L. Adams and Richard L. Stith. Seattle, University of Washington, 1931. 79 p. bibliog., diagrs., illus., tables. (Engineering experiment station bulletin no. 57)

The Vertical wind tunnel of the National advisory committee for aeronautics, by Carl J. Wenzinger and Thomas A. Harris. Washington, U. S. Govt. print. off., 1931. 10 p. diagrs., illus. (N.A.C.A. Report no. 387) (Abstract Aircraft engineering, London, Feb. 1932, v. 4, no. 36, p. 29-31)

Wind tunnel interference on streamline bodies, by C. N. H. Lock and F. C. Johansen. London, H. M. Stat. off., 1931. 21 p. diagrs. (A.R.C. R. & M. no. 1451)

Wind tunnel of the Bucharest polytechnic institute. Washington, 1931. 2 p. illus. (N.A.C.A. Technical memorandums no. 651)

Effect of turbulence in wind tunnel measurements, by Hugh L. Dryden and Arnold M. Kuethe. Washington, U. S. Govt. print. off., 1930. 26 p. diagrs., illus., tables. (N.A.C.A. Report no. 342)

The Electrodynamometric balance of the small wind tunnel of the French service of aeronautical research, by P. Rebuffet. Washington, 1930. 10 p. illus. (N.A.C.A. Technical memorandums no. 556)

Experimental determination of jet boundary corrections for airfoil tests in four open wind tunnel jets of different shapes, by M. Knight and T. A. Harris. Washington, U. S. Govt. print. off., 1930. 27 p. diagrs., illus. (N.A.C.A. Report no. 361)

Experiments with a model water tunnel, by Eastman N. Jacobs and Ira H. Abbott. Washington, 1930. 10 p. diagrs., illus. (N.A.C.A. Technical notes no. 358)

WIND TUNNELS

Exploration of the flow near the screw proposed for the N.P.L. compressed air tunnel, by C. N. H. Lock and A. R. Collar. London, H. M. Stat. off., 1930. 7 p. diagrs., tables. (A.R.C. R. & M. no. 1293)

The 5-ft. open jet wind tunnel R.A.E., by F. B. Bradfield. London, H. M. Stat. off., 1930. 11 p. diagrs., illus. (A.R.C. R. & M. no. 1364)

Maximum lift in closed and open jet tunnels, by F. B. Bradfield, K. W. Clark and R. A. Fairthorne. London, H. M. Stat. off., 1930. 19 p. diagrs., illus., tables. (A.R.C. R. & M. no. 1363)

On the validity of large scale tests in an open jet wind tunnel, by W.G.A. Perring and C. Callen. London, H. M. Stat. off., 1930. 12 p. diagrs., tables. (A.R.C. R. & M. no. 1348) (Abstract Mechanical engineering, New York, May 1931, v. 53, p. 376)

Velocity in a wind channel throat, by T. E. Stanton. London, H. M. Stat. off., 1930. 3 p. diagrs., tables. (A.R.C. R. & M. no. 1388)

Wind channel wall interference, by F. G. Glass. Moscow, Scientific technical department of the Supreme council of national economy, 1930. 23 p. diagrs., tables. (C.A.H.I. Transactions no. 55) (Abstract L'Aerotecnica, Roma, June 1930, v. 10, no. 6, p. 500)

The Interference of a wind tunnel on a symmetrical body, by C. N. H. Lock. London, H. M. Stat. off., 1929. 20 p. diagrs., tables. (A.R.C. R. & M. no. 1275) (Abstract Aircraft engineering, London, July 1930, v. 2, no. 17, p. 188)

Investigation of air flow in open-throat wind tunnels, by Eastman N. Jacobs. Washington, U. S. Govt. print. off., 1929. 11 p. diagrs. (N.A.C.A. Report no. 322)

Sphere drag tests in the variable density wind tunnel, by Eastman N. Jacobs. Washington, 1929. 10 p. diagrs. (N.A.C.A. Technical notes no. 312)

An Automatic speed control for wind tunnels, by A. F. Zahm. Washington, 1928. 15 p. illus., tables. (N.A.C.A. Technical notes no. 278)

A Comparison of propeller and centrifugal fans for circulating the air in a wind tunnel, by Fred E. Weick. Washington, 1928. 7 p. diagrs., illus., tables. (N.A.C.A. Technical notes no. 281)

BOOKS AND PAMPHLETS

Experiments on models of a compressed air wind tunnel, by R. Jones and A. H. Bell. London, H. M. Stat. off., 1928. 22 p. diagrs. (A.R.C. R. & M. no. 1355) (Abstract L'Aerotecnica, Roma, Mar. 1932, v. 12, no. 3, p. 396)

Flygtekniska laboratorier, av Ivar Malmer. Stockholm, Ingeniörs vetenskaps akademien, 1928. 34 p. diagrs., tables. (Meddelande no. 82)

A High speed wind channel for tests on aerofoils, by T. E. Stanton. London, H. M. Stat. off., 1928. 9 p. diagrs., tables. (A.R.C. R. & M. no. 1130)

On improvement of air flow in wind tunnels, by C. Wieselsberger. Washington, 1928. 9 p. diagrs. (N.A.C.A. Technical memorandums no. 470) (From Journal of the Society of mechanical engineers of Japan, Tokyo, June 1925, v. 28, no. 98)

The Resistance of the international airship models measured in the wind tunnel of the Royal college of science, South Kensington, S.W., by F. T. Hill and T. Tanner. London, H. M. Stat. off., 1928. 9 p. diagrs. (A.R.C. R. & M. no. 1160)

A Theoretical estimate of the pressure gradient in a wind tunnel, by H. Glauert. London, H. M. Stat. off., 1928. 11 p. (A.R.C. R. & M. no. 1159)

The Twenty-foot propeller research tunnel of the National advisory committee for aeronautics, by Fred E. Weick and Donald H. Wood. Washington, U. S. Govt. print. off., 1928. 13 p. diagrs., illus. (N.A.C.A. Report no. 300) (Abstract L'Aerotecnica, Roma, Nov. 1929, v. 9, no. 11, p. 921)

Windkanäle, von Emil Everling. (In Handbuch der physikalischen und technischen mechanik. Leipzig, J. A. Barth, 1928. v. 6, p. 580-84. diagrs.)

Wing flutter investigation on Brady's wind tunnel model, by John E. Younger. Washington, U.S. Govt. print. off., 1928. 3 p. diagrs. (Air corps information circular no. 608)

The Effect of the walls in closed type wind tunnels, by George J. Higgins. Washington, U.S. Govt. print. off., 1927. 18 p. diagrs., illus., tables. (N.A.C.A. Report no. 275)

Method of correcting wind tunnel data for omitted parts of airplane models, by R. H. Smith. Washington, 1927. 10 p. illus. (N.A.C.A. Technical notes no. 254)

WIND TUNNELS

The One-foot wind tunnel at the National physical laboratory; including particulars of calibration made with a Pitot tube and vane anemometer at low speeds, by L. F. G. Simmons and L. J. Jones. London, H. M. Stat. off., 1927. 9 p. diagrs., illus. (A.R.C. R. & M. no. 1103)

Study of open jet wind tunnel cones, by Fred E. Weick. Washington, 1927. 13 p. diagrs., illus. (N.A.C.A. Technical notes no. 260)

Variable density wind tunnel. Report of the scale effect panel. London, H. M. Stat. off., 1927. 4 p. diagrs. (A.R.C. R. & M. no. 1142)

Wall interference in closed type wind tunnels, by George J. Higgins. Washington, 1927. 6 p. diagrs. (N.A.C.A. Technical notes no. 256)

The Belgian aerotechnical laboratory at Rhode-Saint-Genese. Washington, 1926. 8 p. illus. (N.A.C.A. Technical memorandums no. 377) (From Bulletin of the Technical service of aeronautics, Brussels, Jan. 1926)

An Experimental investigation of the flow of air in a flat broadening channel, by A. N. Vedernikoff. Moscow, Scientific technical department of the Supreme council of national economy, 1926. 42 p. diagrs., illus., tables. (C.A.H.I. Transactions no. 21)

Investigation of turbulence in wind tunnels by a study of the flow about cylinders, by H. L. Dryden and R. H. Heald. Washington, U.S. Govt. print. off., 1926. 17 p. diagrs., illus. (N.A.C.A. Report no. 231)

On the advantages of an open jet type of wind tunnel for airscrew tests, by H. Glauert and C. N. H. Lock. London, H. M. Stat. off., 1926. 10 p. diagrs. (A.R.C. R. & M. no. 1033)

On the effect of the walls of an experimental tank on the resistance of a model, by H. Lamb. London, H. M. Stat. off., 1926. 6 p. diagrs. (A.R.C. R. & M. no. 1010)

The Variable density wind tunnel of the National advisory committee for aeronautics, by Max M. Munk and Elton W. Miller. Washington, U.S. Govt. print. off., 1926. 18 p. diagrs., illus., plans. (N.A.C.A. Report no. 227)

The Wind balance in the Boeing aerodynamical laboratory at the University of Washington, by F. B. Farquharson. Seattle, University of Washington, 1926. 21 p. diagrs., illus. (Engineering experiment station bulletin no.38)

BOOKS AND PAMPHLETS

A Continuous rotation balance for the measurement of pitching and yawing moments due to angular velocity of roll, by T. Lavender. London, H. M. Stat. off., 1925. 3 p. illus., plates. (A.R.C. R. & M. no. 936)

High velocity wind tunnels. Their application to ballistics, aerodynamics and aeronautics, by E. Huguenard. Washington, 1925. 29 p. illus. (N.A.C.A. Technical memorandums, no. 318) (From La Technique aéronautique, Paris, Nov. 15-Dec. 15, 1924, no. 37-38)

The Aerodynamic laboratory of the Belgian "service technique de l'aéronautique." Washington, 1924. 5 p. illus. (N.A.C.A. Technical memorandums no. 292) (From Bulletin du service technique de l'Aéronautique, Bruxelles, May 1924)

Aerodynamical balance of the "Etalon" type, by K. A. Ushakoff. Moscow, Scientific technical department of the Supreme council of national economy, 1924. 23 p. diagrs., illus. (C.A.H.I. Transactions no. 5)

The Effect of wind tunnel interference on a combination of airscrew and tractor body, by C. N. H. Lock and E. H. Bateman. London, H. M. Stat. off., 1924. 6 p. diagrs., illus., tables. (A.R.C. R. & M. no. 919)

The Effect of wind-tunnel turbulence upon the forces measured on models, by W. L. Le Page and J. T. Nichols. Washington, 1924. 11 p. diagrs., tables. (N.A.C.A. Technical notes no. 191)

An Experimental test of the Prandtl correction for tunnel wall interference, by W. L. Cowley and L. J. Jones. London, H. M. Stat. off., 1924. 4 p. diagrs., tables. (A.R.C. R. & M. no. 898)

The Interference of wind channel walls on the downwash angle and the tail setting to trim, by H. Glauert and A. S. Hartshorn. London, H. M. Stat. off., 1924. 9 p. diagrs., tables. (A.R.C. R. & M. no. 947)

Scientific researches; wind tunnels illustrated. (In Menschenflug (Human Flight). Stuttgart, Franckhs technischer verlag, Dieck und co., 1924. p. 58-59. diagrs.

A Direction and velocity meter for use in wind tunnel work, by T. Lavender. London, H. M. Stat. off., 1923. 4 p. illus. (A.R.C. R. & M. no. 844)

The "Duplex" wind tunnel of the National physical laboratory, by T. Lavender. London, H. M. Stat. off., 1923. 3 p. diagrs., illus., tables. (A.R.C. R. & M. no. 879)

WIND TUNNELS

Elimination of the static pressure gradient along wind tunnels of the N.P.L. type, by L. F. G. Simmons and E. Ower. London, H. M. Stat. off., 1923. 7 p. diagrs., illus., tables. (A.R.C. R. & M. no. 873)

The Interference of wind channel walls on the aerodynamic characteristics of an aerofoil, by H. Glauert. London, H. M. Stat. off., 1923. 7 p. (A.R.C. R. & M. no. 867)

Langley Field wind tunnel apparatus: Part I - Regulators for speed of wind tunnel drive motor. Part II - A Vernier manometer with adjustable sensitivity, by David L. Bacon. Washington, 1923. 9 p. (N.A.C.A. Technical notes no. 81)

Model supports and their effect on the results of wind tunnel tests, by David L. Bacon. Washington, 1923. 7 p. (N.A.C.A. Technical notes no. 130)

An Attachment of the main balance of 7 ft. no. 2 wind tunnel for measuring three forces and three moments, by T. H. Fewster, T. Lavender and G. F. Henderson. London, H. M. Stat. off., 1922. 2 p. diagrs. (A.R.C. R. & M. no. 822)

A Continuous rotation balance for the measurement of Lp at small rates of roll, by E. F. Relf and T. Lavender. London, H. M. Stat. off., 1922. 4 p. diagrs. (A.R.C. R. & M. no. 828)

Description of lift, vertical force and drag balances for the roof of the duplex wind tunnel, by T. H. Fewster. London, H. M. Stat. off., 1922. 4 p. diagrs., illus. (A.R.C. R. & M. no. 823)

The No. 2, 7-foot wind channel at the Royal aircraft establishment. London, H. M. Stat. off., 1922. 4 p. diagrs., tables. (A.R.C. R. & M. no. 847)

The Six-component wind balance, by A. F. Zahm. Washington, U.S. Govt. print. off., 1922. 12 p. illus. (N.A.C.A. Report no. 146)

Design of wind tunnels and wind tunnel propellers. Part II, by Frederick H. Norton and Edward P. Warner. Washington, U.S. Govt. print. off., 1921. 10 p. diagrs., illus., plates. (N.A.C.A. Report no. 98)

Experiment on the design of intake bell for a wind tunnel. Washington, U.S. Govt. print. off., 1921. 8 p. illus. (Air Service information circular no. 217)

BOOKS AND PAMPHLETS

Experiments on models of a "Duplex" wind channel, by Thomas E. Stanton and J. H. Hyde. Technical report of the advisory committee of aeronautics, London, 1921, v. 1, p. 37-50, 33-36.

Langley Field wind tunnel apparatus, by David L. Bacon. Washington, 1921. 4 p. illus. (N.A.C.A. Technical notes no. 65) (Abstract Aerial age, New York, Nov. 14, 1921, v. 14, no. 10, p. 225-26)

N.A.C.A. Langley Field wind tunnel apparatus. The tilting manometer, by Frederick H. Norton and David L. Bacon. Washington, 1921. 3 p. diagrs. (N.A.C.A. Technical notes no. 36)

A New method of testing models in wind tunnel, by V. Margoulis. Washington, 1921. 19 p. diagrs. (N.A.C.A. Technical notes no. 52) (Abstracts Aerial age, New York, Sep. 26, 1921, v. 14, no. 3, p. 58-61 and Aeronautics, London, Dec. 9, 1920, v. 19, no. 373, p. 412-13)

On a new type of wind tunnel, by Max M. Munk. Washington, 1921. 19 p. (N.A.C.A. Technical notes no. 60) (Abstract Aviation, New York, Aug. 8, 1921, v. 11, no. 6, p. 162-63)

The Optical wing aligning device of the Langley Field tunnel, by Frederick H. Norton and David L. Bacon. Washington, 1921. 3 p. diagrs. (N.A.C.A. Technical notes no. 35) (Abstract Aerial age, New York, Feb. 21, 1921, v. 12, no. 24, p. 610)

The Toronto aerodynamic laboratory, by J. H. Parkin. Toronto, University of Toronto, 1921. (School of engineering research bulletin no. 2, p. 10-15)

Design of recording wind tunnel balances, by Frederick H. Norton. Washington, 1920. 6 p. diagrs. (N.A.C.A. Technical notes no. 30) (Abstracts Aerial age, New York, Jan. 24, 1921, v. 12, no. 20, p. 511-12 and Aviation, New York, Jan. 31, 1921, v. 10, no. 5, p. 145-46)

Experimental methods - wind tunnels, by G. P. Thomson. (In his Applied aerodynamics. London, Hodden and Stoughton company, 1920. p. 34-55. diagrs., illus.)

Laboratory apparatus - the wind channel, by Leonard Bairstow. (In his Applied aerodynamics. New York; London, Longmans, Green and company, 1920. p. 94-97. diagrs., illus.)

Wind tunnel balances, by Edward P. Warner and Frederick. H. Norton. Washington, U.S. Govt. print. off., 1920. 40 p. illus., tables. (N.A.C.A. Report no. 72)

WIND TUNNELS

Apparatus for measurements of Mq. on a complete model aeroplane, by L. W. Bryant. London, H. M. Stat. off., 1919. 4 p. diagrs. (A.R.C. R. & M. no. 616)

The Design of wind tunnels and wind tunnel propellers including some experiments on model wind tunnels, by Edward P. Warner, Frederick H. Norton and Clarence M. Hebbert. Washington, U.S. Govt. print. off., 1919. 24 p. diagr., illus., plates. (N.A.C.A. Report no. 73)

Model experiments on the possibility of producing a wind channel of simple construction where great uniformity and steadiness of wind are not required, by R. J. H. Ellis. London, H. M. Stat. off., 1919. 6 p. diagrs., tables. (A.R.C. R. & M. no. 587)

Description of apparatus for measurement in a wind tunnel of the performance of an airscrew or the windage torque of a rotary engine, by A. Fage, H. E. Collins and T. H. Fewster. London, H. M. Stat. off., 1918. 4 p. diagrs. (A.R.C. R. & M. no. 563)

Report on tests of a model of the proposed no. 2, 7-ft. wind channel at the R.A.E., by C. G. Sandison and W. K. Alford. London, H. M. Stat. off., 1918. 20 p. diagrs., tables. (A.R.C. R. & M. no. 574)

Wind tunnel. Washington, U.S. Govt. print. off., 1918. (N.A.C.A. 4th annual report, p. 24) (Part of equipment for research at Langley Field)

Experimental research on air propellers. Part I. The Aerodynamic laboratory at Leland Stanford junior university, by William F. Durand. Washington, U.S. Govt. print. off., 1917. illus. (N.A.C.A. Report no. 14) (Also Aeronautics, London, Apr. 17, 1918, v. 14, no. 235, p. 335-43) (Abstract Journal of the A.S.M.E., New York, May 1918, v. 40, no. 5, p. 435-36)

Experiments on models of a "Duplex" wind channel. London, H. M. Stat. off., 1917. 20 p. (A.R.C. R. & M. no. 522)

Description du tunnel plat du laboratoire aérodynamique de l'École impériale technique de Moscou, par Nikolai J. Joukowski. (In his Aérodynamique. Paris, Gauthier-Villars, 1916. p. 156-62. diagrs., illus.)

Description of improved moments measuring apparatus for tests on models in the wind channel, with an appendix on the determination of correction due to interference of apparatus on model, by L. W. Bryant and H. B. Irving. London, H. M. Stat. off., 1915-1916. 5 p. diagrs. (A.R.C. R. & M. no. 192)

BOOKS AND PAMPHLETS

A Description of the three-foot air channel at the National physical laboratory, and a comparison of the results obtained in it with those of the four-foot channel. London, H. M. Stat. off., 1914. 5 p. diagrs., tables. (A.R.C. R. & M. no. 103)

Method of experimental determination of the forces and moments on a model of a complete aeroplane; with the results of measurements on a model of a monoplane of a Blériot type. London, H. M. Stat. off., 1913. 5 p. diagrs., tables. (A.R.C. R. & M. no. 75)

The New four-foot wind channel; with description of the weighing mechanism employed in the determination of forces and moments, by Leonard Bairstow, J. H. Hyde and Harris Booth. London, H. M. Stat. off., 1913. 13 p. diagrs., illus., tables. (A.R.C. R. & M. no. 68)

An Investigation into the steadiness of wind channels, as affected by the design both of the channel and of the building by which it is inclosed for shielded, by Leonard Bairstow and Harris Booth. London, H. M. Stat. off., 1912. 11 p. diagrs. (A.R.C. R. & M. no. 67)

Les Nouvelles recherches expérimentales sur la résistance de l'air et l'aviation faites aux laboratoires du Champ de Mars et Auteuil, par Gustave Eiffel. Paris, 1912. 37 p.

Apparatus for the visual and photographic study of the distribution of the flow round plates and models in a current of water, by C. G. Eden. London, H. M. Stat. off., 1911. 2 p. (A.R.C. R. & M. no. 31)

Bericht über die tätigkeit der Göttinger modellversuchsanstalt, von Ludwig Prandtl. (In Jahrbuch der motorluftschiff-studiengesellschaft, Berlin, 1910-11. v. 4, p. 43-50. diagrs., illus.)

Installation d'un laboratoire d'aérodynamique, par Gustave Eiffel. Paris, Imprimerie Chaix, 1910. 40 p. diagrs., illus., plates. (Also Bulletin des mémoires et travaux de la Société des ingénieurs civils de France, Paris, Jan. 1910, ser. 6, v. 63, no. 1, p. 7-45) (Abstracts Téchnique moderne, Paris, May 1910, v. 2, no. 5, p. 263-68 and Wiener luftschiffer zeitung, Wien, June 15, 1910, v. 9, no.12, p. 226)

Report on the experimental equipment of the aeronautical department of the National physical laboratory, by T. E. Stanton. London, H. M. Stat. off., 1909-10. 5 p. diagrs. (A.R.C. R. & M. no. 25)

Section II

ARTICLES, BOOKS AND PAMPHLETS - CLASSIFIED

DESIGN AND CONSTRUCTION

On high speed wind tunnels, by B. V. Korvin-Kroukovsky. Journal of the Franklin institute, Philadelphia, Pa., Apr. 1939, v. 227, p. 460-71. diagrs., illus., tables.

Original wind tunnel for Wright Brothers, by G. Brewer. U.S. Air services, Washington, Nov. 1938, v. 23, no. 11, p. 17-18. diagrs. (Review Journal of the aeronautical sciences, New York, Jan. 1939, v. 6, no. 3, p.120)

Experimental apparatus and methods of measurement. Fluid mechanics panel of the British A.R.C. and collaborators. (In Modern developments in fluid dynamics. London, Oxford university press, 1939. v. 1-2. chap. 6)

Some results from the "Deutsche forschungsanstalt für segelflug" smoke tunnel, by A. Lippisch. London, R.A.S. preprint for meeting, Dec. 15, 1938. 8 p. diagr., illus. (Abstract Aeroplane, London, Dec. 28, 1938, v. 55, p. 849-53)

Large steel wind tunnel completed at M.I.T. Journal of the aeronautical sciences, New York, Dec. 1938, v. 6, no. 2, p. 77. (Also Iron age, New York, Oct. 20, 1938, v. 142, no. 16, p. 28, 84)

La Costruzione delle gallerie aerodinamiche di Guidonia, di Salvatore Cannavo. Annali dei lavori pubblici, Roma, Sep. 1938, v. 76, no. 9, p. 741-55. diagrs., illus., tables.

Icing of Pitot static tubes, by Victor E. Carbonara and A. G. Binnie. Journal of the aeronautical sciences, New York, Aug. 1938, v. 5, no. 10, p. 400-03. diagrs., illus., tables.

Description générale de la soufflerie de l'École polytechnique de Bucarest, par E. Carafoli. (In Travaux du laboratoire aérodynamique, Bucarest, 1938, v. 1, p. 7-27. illus., tables) (Abstract Aero digest, New York, Jan. 1939)

Les Travaux de Vladimir Margoulis (souffleries du Japon) par A. Toussaint. L'Aéronautique, Paris, May 1937, v. 19, no. 216, p. 122-25.

WIND TUNNELS

La "Galleria del vento" dell'Istituto di costruzioni aeronautiche del R. politecnico di Milano, di S. Bassi. L'Aerotecnica, Roma, Apr. 1937, v. 17, no. 4, p. 317-27. diagrs., illus., tables.

M.I.T. new wind tunnel as a memorial to Wright brothers, by J. C. Hunsaker. Journal of the aeronautical sciences, New York, Apr. 1937, v. 4, no. 6, p. 262.

The Projected wind tunnel at the Massachusetts institute of technology, by J. C. Hunsaker. Scientific monthly, New York, Apr. 1937, v. 44, p. 390.

Test methods involved in the operation of a commercial wind tunnel, by B. G. Eaton Jr. Aero digest, New York, Apr. 1937, v. 30, no. 4, p. 28-29, 46, 100. diagrs., illus., tables.

Untersuchung eines windkanals, von S. Hoerner. Luftfahrtforschung, München, Jan. 20, 1937, v. 14, no. 1, p. 36-43. diagrs., illus., tables.

The Construction and calibration of the V.P.I. wind tunnel, by Norvel White Conner. Blacksburg, Va., Virginia polytechnic institute, 1937. diagrs., illus., tables. (Engineering experiment station bulletin, July 1937, v. 30, no. 9, p. 5-32)

Conversion of the Staunton 3-inch high-speed wind tunnel of the open jet type, by A. Bailey and S. A. Wood. Proceedings of the Institution of mechanical engineers, London, 1937, v. 135, p. 445-66.

On the results of aerodynamic research and their application to aircraft construction, by Clark B. Millikan. Journal of the aeronautical sciences, New York, Dec. 1936, v. 4, no. 2, p. 43—53. diagrs.

La Soufflerie "atmosphérique" des ateliers de Mureaux. Les Ailes, Paris, Nov. 12, 1936, p. 5-6. illus.

Aérodynamique expérimentale, par C. Demars. Revue universelle des mines, Liège, Belgium, Oct. 1936, v. 12, no. 10, p. 415-29.

Reports on wind tunnel experiments in aerodynamics, by Jerome C. Hunsaker. Aerial age, New York, Mar. 6, 20, 27, 1916, v. 2-3, no. 25; 1; 2, p. 596-97; 18-19; 60-61. illus. (Also Aeronautics, London, Mar. 8-15, 1916, v. 10, no. 125-126, p. 159-61; 173-76)

Description of the aerodynamic laboratory of the Massachusetts institute of technology, by Jerome C. Hunsaker. Scientific american supplement, New York, June 5, 1915, v. 79, no. 2057, p. 364-65.

An Investigation into the steadiness of wind channels, as affected by the design both of the channel and of the building by which it is inclosed or shielded, by Harris Booth and Leonard Bairstow. London, H. M. Stat. off., 1912. 11 p. diagrs. (A.R.C. R. & M. no. 67)

Eiffel's experiments; the Eiffel aerodynametric installation. Scientific american, New York, Oct. 22, 1910, no. 1816, p. 265-66. illus.

Installation d'un laboratoire d'aérodynamique, par Gustave Eiffel. Paris, Imprimerie Chaix, 1910. 40 p. diagrs., illus., plans, plates. (Also Bulletin des mémoires et travaux de la Société des ingénieurs civils de France, Paris, Jan. 1910, v. 63, no. 1, p. 7-45)

Construction and equipment of wind tunnels, by A. F. Zahm. Aeronautics, New York, Apr. 1908, v. 2, no. 4, p. 25-28.

EQUIPMENT - BALANCES

Wind-tunnel equipment of Blackburn aircraft, ltd. Engineering, London, Apr. 14-21, 1939, v. 147, p. 423-25, 461-64. diagrs., illus.

WIND TUNNELS

On the Kawasaki 2.5 m wind-tunnel (7 component balance), by H. Yamastita. Journal of the Society of aeronautical sciences, of Japan, Tokyo, Jan. 1939, v. 6, no. 45, p. 29-44.

Wind tunnel balance. Engineering, London, June 11, 1937, v. 143, no. 3726, p. 661. illus. (Also Engineer, London, June 11, 1937, v. 163, no. 4248, p. 672-73)

Test methods involved in the operation of a commercial wind tunnel, by B. G. Eaton, Jr. Aero digest, New York, Apr. 1937, v. 30, no. 4, p. 28-29, 46, 100. diagrs., illus.

Wind tunnel balances in the Aeronautics department of Cambridge university, by W. S. Farren. Journal of the aeronautical sciences, New York, Feb. 1937, v. 4, no. 4, p. 160-62. illus.

The National physical laboratory. Apparatus and equipment. Wind tunnels and balances. Engineering, London, Sep. 11, 1936, v. 142, no. 3687, p. 287-88. diagrs., illus. (Review Journal of the aeronautical sciences, New York, Feb. 1937, v. 4, no. 4, p. 169)

Elektrisch gesteuerte laufgewichtswaage für hohe messgenauigkeit und fernaufzeichnung der messwerte, von Max Kramer. Zeitschrift des V.D.I., Berlin, Feb. 8, 1936, v. 80, no. 6, p. 141-45. diagrs., illus., tables. (Also Aircraft engineering, London, June 1936, v. 8, no. 88, p. 151-53) (Abstract Journal of the R.A.S., London, Sep. 1936, v. 40, p. 709)

Twenty-four-foot wind tunnel at Farnsborough; model balances. Engineer, London, May 17, 1935, v. 159, no. 4140, p. 516-19. diagrs., illus.

Twenty-four-foot wind tunnel at Farnsborough. Main aerodynamic balance. Engineer, London, May 3, 1935, v. 159, no. 4138, p. 468-71. (Also Engineering, London, Apr. 12, 1935, v. 139, no. 3613, p. 396-97)

Balance aérodynamique permettant le trace continu des polaires, par A. Lafay. Paris, E. Blondel La Rougery, 1935. diagrs. (Pub. scient. tech. Min. de l'air no. 79, p. 1-6)

The Denis-Cruson six component wind-tunnel balance. Washington, 1935. 6 p. diagrs., illus. (N.A.C.A. Technical memorandums no. 772) (Also L'Aérophile, Paris, May 1935, v. 43, no. 5, p. 137-42)

EQUIPMENT - BALANCES

Electric aerodynamic balance. Aircraft engineering, London, Sep. 1933, v. 5, no. 55, p. 200-02.

Continuous rotation balance for measurement of yawing and rolling moments in a spin, by P. H. Allwork. London, H. M. Stat. off., 1933. 6 p. diagrs., illus. (A.R.C. R. & M. no. 1579)

Il Laboratorio aerodinamico della direzione superiore studi ed esperienze del Ministero dell'aeronautica, di A. Eula. L'Aerotecnica, Roma, Feb., Apr. 1932, v. 12, no. 2, 4, p. 143-66; 447-72, 640. diagrs., illus.

An Electromagnetic balance for force measurement or current control, by Fred S. Eastman. Seattle, University of Washington, 1932. 29 p. illus. (Engineering experiment station bulletin no. 60)

Neue versuchseinrichtungen. 1. Die sechskomponenten-waage des grossen windkanals, von A. Betz und L. Prandtl. Ergebnisse der aerodynamischen versuchsanstalt zu Göttingen. München und Berlin, IV lieferung, 1932. p. 8-12. illus.

Soufflerie aérodynamique à dynamomètres électrométriques du Service des recherches de l'aéronautique, par P. Rebuffet. Paris, Gauthier-Villars, 1932. 125 p. diagrs., illus., tables. (Pub. scient. tech. Min. de l'air no. 5) (Translated Aircraft engineering, London, May 1932, v. 4, p. 127)

Untersuchung von flugzeugmodellen im windkanal. V. kapitel: Wägeeinrichtungen, von R. Seiferth and A. Betz. (In Handbuch der experimentalphysik, von L. Schiller. Leipzig, 1932. v. 4, pt. 2, p. 130-62. diagrs.)

Vacuum-tube control for electric wind-tunnel balances, by Fred S. Eastman. Seattle, University of Washington, 1931. 16 p. illus. (Engineering experiment station bulletin no. 35)

Some improvements in wind-tunnel balances made possible by use of vacuum tubes, by Fred S. Eastman. Journal of the A.S.M.E., New York, Dec. 1930, v. 2, no. 4, p. 217-22. diagrs.

Ein Einfaches sechskomponenten messgerät der neuen windkanalanlage am Kyffhäusertechnikum, Bad Frankenhausen, von Ernst von Lössl. Z.F.M., München und Berlin, Aug. 14, 1930, v. 21, no. 15, p. 393-96. illus.

WIND TUNNELS

The Electrodynamometric balance of the small wind tunnel of the French service of aeronautical research, by P. Rebuffet. Washington, 1930. 10 p. illus. (N.A.C.A. Technical memorandums no. 556)

Curtiss-Wright research plant at Garden City is laboratory for aircraft development, by A. B. Crofoot. Automotive industries, Philadelphia, Pa., Dec. 14, 1929, v. 61, no. 34, p. 864-66. (eight component balance)

A High speed wind channel for tests on aerofoils, by T. E. Stanton. London, H. M. Stat. off., 1928. 9 p. diagrs., table. (A.R.C. R. & M. no. 1130)

The Twenty-foot propeller research tunnel of the N.A.C.A., by Fred E. Weick and D. H. Wood. Washington, U.S. Govt. print. off., 1928. 13 p. diagrs., tables. (N.A.C.A. Report no. 300) (Abstract L'Aerotecnica, Roma, Nov. 1929, v. 9, no. 11, p. 921)

The Resistance of the airship models measured in the wind tunnels of Japan. Japan aeronautical council. Tokyo, Tokyo imperial university, 1926. (Aeronautical research institute report no. 15, p. 12-13, 27-28)

The Variable density wind tunnel of the N.A.C.A., by Max M. Munk and E. W. Miller. Washington, U.S. Govt. print. off., 1926. 18 p. diagrs., illus., table. (N.A.C.A. Report no. 227)

The Wind balance in the Boeing aerodynamical laboratory at the University of Washington, by F. B. Farquharson. Seattle, Washington, University of Washington, 1926. 21 p. diagrs., illus. (Engineering experiment station bulletin no. 38)

New air balance and small wind tunnel, by Albert A. Merrill. Aviation, New York, Mar. 30, 1925, v. 18, no. 13, p. 350-51. illus.

A Continuous rotation balance for the measurement of pitching and yawing moments due to angular velocity of roll, by T. Lavender. London, H. M. Stat. off., 1925. 3 p. illus., plates. (A.R.C. R. & M. no. 936)

Wire suspensions in wind tunnel experiments, by Jean Kerneis. Washington, 1925. 14 p. illus. (N.A.C.A. Technical memorandums no. 342) (From L'Aérophile, Paris, Sep. 1-15, 1925, v. 33, p. 267-72)

The Airfoil; the wind tunnel; its operation, by Charles N. Monteith. (In his Simple aerodynamics and the airplane. Dayton, Ohio, McCook Field, 1924. p. 22-66. diagrs.)

EQUIPMENT - BALANCES

Aerodynamical balance of the "Etalon" type, by K. A. Ushakoff. Moscow, Scientific technical department of the Supreme council of national economy, 1924. 23 p. diagrs., illus. (C.A.H.I. Transactions no. 5)

Bilancia aerodinamica di torsione presso il laboratorio di aeronautica del R. Politecnico di Torino, di Carlo Luigi Ricci. Ingegneria, Milano, Nov. 1, 1922, v. 1, no. 5, p. 121-26. illus.

An Attachment of the main balance of 7 ft. no. 2 wind tunnel for measuring three forces and three moments, by T. H. Fewster, T. Lavender and G. F. Henderson. London, H. M. Stat. off., 1922. 2 p. diagrs. (A.R.C. R. & M. no. 822)

A Continuous rotation balance for the measurement of Lp at small rates of roll, by E. F. Relf and T. Lavender. London, H. M. Stat. off., 1922. 2 p. diagrs. (A.R.C. R. & M. no. 828)

Description of lift, vertical force and drag balances for the roof of the Duplex wind tunnel, by T. H. Fewster. London, H. M. Stat. off., 1922. 4 p. diagrs., illus. (A.R.C. R. & M. no. 823)

The Six-component wind balance, by A. F. Zahm. Washington, U.S. Govt. print. off., 1922. 12 p. illus. (N.A.C.A. Report no. 146)

The Bifilar windbalance, by A. F. Zahm. Journal of the Franklin institute, Philadelphia, Pa., Aug. 1921, v. 192, p. 233-37. illus.

Die Windstromanlage des luftschiffbau Zeppelin, von Max M. Munk. Z.F.M., München und Berlin, Jan. 31-Feb. 15, 1921, v. 12, no. 2-3, p. 20-22; 35-38.

Die Dreikomponentenwage, von C. Wieselsberger. Ergebnisse der Göttinger aerodynamischen versuchsanstalt, München und Berlin, 1921, v. 1, p. 27-29. illus.

Langley Field wind tunnel apparatus, by D. L. Bacon. Washington, 1921. 4 p. illus. (N.A.C.A. Technical notes no. 65) (Abstract Aerial age, New York, Nov. 14, 1921, v. 14, no. 10, p. 225-26)

The Toronto aerodynamic laboratory, by J. H. Parkin. Toronto, University of Toronto, 1921. (School of engineering research bulletin no. 2, p. 10-15)

The Cross-arm wind-balance, by A. F. Zahm. Journal of the Franklin institute, Philadelphia, Pa., Nov. 1920, v. 190, no. 5, p. 685-90. illus.

WIND TUNNELS

Recording instrument for use in wind tunnels, by Albert A. Merrill. Aviation, New York, Apr. 1, 1920, v. 8, no. 5, p. 190-91. diagrs., illus.

An Aerodynamical torsion balance, by A. F. Zahm. Journal of the Franklin institute, Philadelphia, Pa., Apr. 1920, v. 189, p. 463-68. diagrs.

Design of recording wind tunnel balances, by Frederick H. Norton. Washington, 1920. 6 p. diagrs. (N.A.C.A. Technical notes no. 30)

Wind tunnel balances, by Edward P. Warner and Frederick H. Norton. Washington, U.S. Govt. print. off., 1920. 40 p. illus., tables. (N.A.C.A. Report no. 72)

Wind tunnel experimentation, by Alexander Klemin. Aviation, New York, Sep. 1, 1919, v. 7, no. 3, p. 132-35. diagrs.

Apparatus for measurements of Mq. on complete model aeroplanes, by L. W. Bryant. London, H. M. Stat. off., 1919. 4 p. (A.R.C. R. & M. no. 616)

Description of improved moments measuring apparatus for tests on models in the wind channel, with an appendix on the determination of correction, due to interference of apparatus on model, by L. W. Bryant and H. B. Irving. London, H. M. Stat. off., 1915. 5 p. diagrs. (A.R.C. R. & M. no. 192)

New aerodynamic balance installed in M.I.T. Aero and hydro, Chicago, Oct. 3, 1914, v. 9, no. 1, p. 5. illus.

The New four-foot wind channel; with description of the weighing mechanism employed in the determination of forces and moments, by L. Bairstow, J. H. Hyde and Harris Booth. London, H. M. Stat. off., 1913. 13 p. diagrs., illus., tables. (A.R.C. R. & M. no. 68)

Report on the experimental equipment of the aeronautical department of the National physical laboratory, by T. E. Stanton. London, H. M. Stat. off., 1909-10. 5 p. diagrs. (A.R.C. R. & M. no. 25)

EQUIPMENT - GENERAL

Icing of Pitot static tubes, by Victor E. Carbonara and A. G. Binnie. Journal of the aeronautical sciences, New York, Aug. 1938, v. 5, no. 10, p. 400-03. diagrs., illus. (diagram of B. F. Goodrich refrigerated wind tunnel)

EQUIPMENT - GENERAL

University of Detroit laboratories (testing equipment), by J. Geschelin. Automotive industries, Philadelphia, Pa., May 14, 1938, v. 78, no. 20, p. 660-62. illus.

Rendiconti sperimentali del laboratorio di aeronautica del R. politecnico di Torino, di Luigi Elia e Carlo Ferrari. L'Aerotecnica, Roma, Feb. 1938, v. 18, no. 2, p. 115-85. diagr.

An Investigation of diffusors for high velocity aerodynamics tunnels, by K. S. Scilard. Journal of technical physics, Leningrad, 1938, v. 8, p. 348-54.

Eine Neue trudelmesseinrichtung, von M. Kramer und K. B. Kruger. Luftfahrtforschung, München und Berlin, Oct. 1937, v. 14, no. 10, p. 475-79. illus.

Early aeronautical research in Canada (Canada's first wind tunnel), by J. J. Green. Canadian aviation, Ottawa, Can., Mar. 1937, v. 10, no. 3, p. 14, 15, 22. illus.

Sur la représentation du sol dans les essais aérodynamiques de véhicules, par F. Gruson. C. R. Acad. sci., Paris, Feb. 15, 1937, v. 204, no. 7, p. 473-75. illus.

The National physical laboratory. Apparatus and equipment. Wind tunnels and balances. Engineering, London, Sep. 11, 1936, v. 142, no. 3687, p. 287-88. diagrs., illus. (Also Journal of the aeronautical sciences, New York, Feb. 1937, v. 4, no. 4, p. 169)

Equipment for laboratory instruction in aerodynamics, by Kenneth G. Merriam. Journal of the aeronautical sciences, New York, Aug. 1936, v. 3, no. 10, p. 353. illus.

The Pasadena junior college wind tunnel, by Albert A. Merrill. Journal of the aeronautical sciences, New York, Aug. 1936, v. 3, no. 10, p. 366-67. illus.

Neue einrichtungen der versuchsabteilung des Junkers-flugzeugwerkes, von H. Roos. Luftfahrtforschung, München und Berlin, Feb. 20, 1936, v. 13, no. 2, p. 67-70.

La Grande soufflerie aérodynamique de Chalais-Meudon (Seine-et-Oise). Les ventilateurs et l'appareillage mécanique, par Paul Calfas. Le Génie civil, Paris, Jan. 11, 1936, v. 108, no. 2, p. 29-34. diagrs., illus.

National physical laboratory, aerodynamics department. Engineering, London, Oct. 11, 25, 1935, v. 140, no. 3639, 3641, p. 381-83; 438-39. diagrs.

WIND TUNNELS

Twenty-four-foot wind tunnel at Farnborough; - fan drive; electric equipment. Engineer, London, May 24, 1935, v. 159, no. 4141, p. 534-37. (Also Flight, London, Apr. 10, 1935, v. 27, no. 1372, p. 380-83)

Les Installations de mesure de la grande soufflerie de Chalais-Meudon, par A. Lapresle. La Technique aéronautique, Paris, 1935, v. 26, no. 137-138, p. 170-86, 260-76. diagrs., illus.

Principles of aerodynamical design of a wind tunnel nozzle, by G. Abramovitch. Moscow, Scientific technical department of the Supreme council of national economy, 1935. 19 p. (C.A.H.I. Transactions no. 231)

A Belt method of representing the ground, by Alexander Klemin. Journal of the aeronautical sciences, New York, Oct. 1934, v. 1, no. 4, p. 198.

National physical laboratory; aerodynamics department. Engineering, London, Sep. 1934, v. 138, p. 242-44. diagrs.

A Reflection plate representing the ground, by E. A. Stalker. Journal of the aeronautical sciences, New York, July 1934, v. 1, no. 3, p. 151.

The Wave suppressors used in the N.A.C.A. tank, by Starr Truscott. Washington, 1934. 5 p. (N.A.C.A. Technical notes no. 513)

Tekniska hoegskolans flygtekniska laboratorium, av Ivar Malmer. Teknisk tidskrift, Stockholm, Oct. 1933, no. 10, p. 108-17.

Pilgrimage to Langley. Aviation, New York, July 1932, v. 31, no. 7, p. 300-03. illus.

Soufflerie aérodynamique à dynamomètres électrométriques du service des recherches de l'aéronautique, par P. Rebuffet. Paris, E. Blondel la Rougery, 1932. 123 p. diagrs., illus., tables. (Pub. scient. tech. Min. de l'air no. 5) (Abstract Journal of the R.A.S., London, Jan. 1933, p. 94)

Venturi wind tunnel number 1. Part II - Design, construction and test of new tunnel propeller, by Frederick K. Kirsten and Robert C. Davis. Seattle, University of Washington, 1932. 26 p. diagrs., illus., tables. (Engineering experiment station bulletin no. 62)

Windkanäle, von Bruno Eck. (In Technische strömugslehre. Berlin, Julius Springer, 1932. v. 2, p. 1-10. diagrs.)

EQUIPMENT - GENERAL

An Integrating manometer for use in wind tunnel pressure distribution measurements, by Richard W. Noyes. Washington, 1931. 6 p. diagrs., plates, tables. (N.A.C.A. Technical notes no. 377) (Abstract L'Aerotecnica, Roma, Jan. 1932, v. 12, no. 1, p. 93)

Die Kälteanlage der D.V.L. (In Jahrbuch der D.V.L. München und Berlin, R. Oldenbourg, 1931. p. 64-66. diagrs., illus.)

Goodrich refrigerated wind tunnel, by C. W. Leguillon. Aviation engineering, East Stroudsburg, Pa., Nov. 1930, v. 3, no. 11, p. 23-24.

The Aeronautical laboratories of the National council of Canada, by J. H. Parkin. Engineering journal, Montreal, Can., Feb. 1930, v. 13, no. 2, p. 95-103. diagrs.

Sur un dispositif de tunnel aérodynamique pour l'étude de l'écoulement à deux dimensions, par C. Martinot-Lagarde. C. R. Acad. sci., Paris, June 17, 1929, v. 18, no. 25, p. 1596-97.

Making aircraft airworthy, by K. M. Painter. Popular mechanics, Chicago, Oct. 1938, v. 50, no. 4, p. 580-85.

An Automatic speed control for wind tunnels, by A. F. Zahm. Washington, 1928. 15 p. illus., tables. (N.A.C.A. Technical notes no. 278)

A Comparison of propeller and centrifugal fans for circulating the air in a wind tunnel, by Fred E. Weick. Washington, 1928. 7 p. illus., tables. (N.A.C.A. Technical notes no. 281)

The Opening of the Institute of aerodynamics, by S. Nemark. Lotnik polski, Warszawa, May 1927, v. 5, no. 5, p. 113-23. diagrs., illus.

Aeronautical model testing, by S. S. Rathbun. Proceedings of the Brooklyn engineers' club, New York, Oct. 1925, v. 24, p. 50-63. diagrs.

The Aerodynamic laboratory of the belgian "Service technique de l'aéronautique." Washington, 1924. 5 p. illus. (N.A.C.A. Technical memorandums no. 292) (From Bulletin du service technique de l'aéronautique, Bruxelles, May 1924)

Apparatus and equipment recently constructed in the aerodynamics department of the National physical laboratory, by R. V. Southwell. Flight, London, July 5, 1923, v. 15, no. 27, p. 370-71. (Also International air congress report for 1923, London, p. 101-16)

WIND TUNNELS

A Direction and velocity meter for use in wind tunnel work, by T. Lavender. London, H. M. Stat. off., 1923. 4 p. illus. (A.R.C. R. & M. no. 844)

Langley Field wind tunnel apparatus; Part I - Regulations for speed of wind tunnel drive motor. Part II - A Vernier manometer with adjustable sensitivity, by David L. Bacon. Washington, 1922. 9 p. diagrs. (N.A.C.A. Technical notes no. 81) (Abstracts Aviation, New York, Feb. 6, 20, 1922, v. 12, no. 8, p. 171, 226-227; 152-53 and Aerial age, New York, Feb. 6, 1922, v. 14, no. 22, p. 518-19)

The Tilting manometer, by Frederick H. Norton and David L. Bacon. Aerial age, New York, Feb. 14, 1921, v. 12, no. 23, p. 585. illus.

German wind tunnels and apparatus, by Edward P. Warner. Aeronautics, London, Dec. 20, 1920, Jan. 6, 1921, v. 19-20, no. 376-377, p. 468-69; 1-11. diagrs. (Also Aviation, New York, Nov. 8, 1920, v. 9, no. 8, p. 258-61 and Aerial age, New York, Nov. 15-22, 1920, v. 12, no. 10-11, p. 275-77; 298)

Langley Field wind tunnel apparatus, by David L. Bacon. Washington, 1921. 4 p. illus. (N.A.C.A. Technical notes no. 65) (Abstract Aerial age, New York, Nov. 14, 1921, v. 14, no. 10, p. 225-26)

N.A.C.A. Langley Field wind tunnel apparatus. The tilting manometer, by Frederick H. Norton and David L. Bacon. Washington, 1921. 3 p. diagrs. (N.A.C.A. Technical notes no. 36)

The Optical wing aligning device of the Langley Field tunnel, by Frederick H. Norton and David L. Bacon. Washington, 1921. 3 p. diagrs. (N.A.C.A. Technical notes no. 35) (Abstract Aerial age, New York, Feb. 21, 1921, v. 12, no. 24, p. 610)

Absolute pressure gauge for wind tunnel use, by J. G. Coffin. Aviation, New York, Apr. 15, 1920, v. 8, no. 6, p. 235-37. illus.

Description of apparatus for measurement in a wind tunnel of the performance of an airscrew, or the windage torque of a rotary engine, by A. Page, H. E. Collins and T. H. Fewster. Aerial age, New York, Apr. 5, 1920, v. 11, no. 4, p. 118, 123. diagrs.

Études sur l'aéronautique faites au laboratoire aérodynamique Eiffel, de 1915 à 1918. Le Génie civil, Paris, Apr. 3, 1920, v. 76, no. 14, p. 325-29. diagrs., illus.

EQUIPMENT - GENERAL

Recording instrument for use in wind tunnels, by Albert A. Merrill. Aviation, New York, Apr. 1, 1920, v. 8, no. 5, p. 190-91. diagrs., illus.

Il Laboratorio di aerodinamica del R. Politecnico di Torino, di Cesare Chiodi. Associazione nazionale degli ingegneri italiani, Milano, Feb. 10, 20, 29, 1920, v. 1, no. 4, 5, 6, p. 21-25; 29-31; 35-36. diagr., illus., tables.

Laboratory apparatus - the wind channel, by Leonard Bairstow. (In his Applied aerodynamics. New York, Longmans, Green and company, 1920. p. 94-97. diagrs., illus., tables)

The Propeller testing laboratory of the army air service at McCook Field, by F. W. Caldwell. Aerial age, New York, Dec. 22, 1919, v. 10, p. 365-70. illus.

Wind tunnel experimentation, by Alexander Klemin. Aviation, New York, Sep. 1, 1919, v. 7, no. 3, p. 132-35. diagrs., illus.

Description of apparatus for measurement in a wind tunnel of the performance of an airscrew or the windage torque of a rotary engine, by A. Fage, H. E. Collins and T. H. Fewster. London, H. M. Stat. off., 1918. 4 p. diagrs. (A.R.C. R. & M. no. 563)

Wind tunnel. Washington, U.S. Govt. print. off., 1918. (N.A.C.A. Fourth annual report, p. 24)

Units employed in recording the results of wind tunnel experiments. Flight, London, Jan. 25, 1917, v. 9, no. 3, p. 83-84.

Experimental research on air propellers. Part I. The Aerodynamic laboratory at Leland Stanford junior university, by William F. Durand. Washington, U.S. Govt. print. off., 1917. illus. (N.A.C.A. Report no. 14) (Abstracts Aeronautics, London, Apr. 17, 1918, v. 14, no. 235, p. 335-43 and A.S.M.E. journal, New York, May 1918, v. 40, no. 5, p. 435-36)

Equipment for experimentation. Aero, St. Louis, Dec. 2, 1911, v. 3, no. 9, p. 181. illus.

Report on the experimental equipment of the aeronautical department of the National physical laboratory, by Thomas E. Stanton. London, H. M. Stat. off., 1909-10. 5 p. diagrs., illus. (A.R.C. R. & M. no. 25)

WIND TUNNELS

Construction and equipment of wind tunnels, by A. F. Zahm. Aeronautics, New York, Apr. 1908, v. 2, no. 4, p. 25-28.

INTERFERENCE, TURBULENCE

On high speed wind tunnels, by B. V. Korvin-Kroukovsky. Journal of the Franklin institute, Philadelphia, Pa., Apr. 1939, v. 227, p. 460-71. diagrs.

Some phases of wind tunnel work, by H. L. Dryden. S.A.E. journal, New York, Apr. 1939, v. 44, no. 4, p. 22.

Korrekturfaktoren für windkanäle elliptischen querschnitts, mit teilweise offener und teilweise geschlossener messtrecke, von F. Riegels. Luftfahrtforschung, München, Jan. 10, 1939, v. 16, no. 1, p. 26-30. diagrs. tables.

Comparison of profile drag and boundary layer measurements obtained in flight and in full-scale wind tunnel, by Harry J. Goett and Joseph Bicknell. Washington, 1939. 10 p. diagrs., illus., tables. (N.A.C.A. Technical notes no. 693)

Correction de soufflerie en veine elliptique, par Lucien Malavard. C. R. Acad. sci., Paris, Dec. 12, 1938, v. 207, no. 24, p. 1168-71. diagrs.

Der Strahleinfluss bei offenen windkanälen, von F. Weinig. Luftfahrtforschung, München, Oct. 10, 1938, v. 15, no. 10-11, p. 556-59. diagrs., tables. (Review Journal of the aeronautical sciences, New York, Feb. 1939, v. 6, no. 4, p. 177)

Wind tunnel interference, by E. F. Relf. (In Handbook of aeronautics. London, Sir Isaac Pitman and sons, 1938. v. 1, p. 41-51. diagrs., tables.)

Windkanalturbulenz, von S. Hoerner. Zeitschrift des V.D.I., Berlin, Nov. 6, 1937, v. 81, p. 1318-19.

Sull'interferenza della galleria aerodinamica con tratto libero, di E. Pistolesi. Volume commemorativo del XXV annuale del laboratorio aeronautico del R. Politecnico di Torino, Oct. 14-17, 1937, p. 206-18. illus.

Turbulence measurements in Tsing Hua 5-foot wind tunnel, by K. L. Feng. Engineering quarterly of the National Tsing Hua university, Japan, June 1937, v. 1, no. 2, p. 217-22. (in japanese)

INTERFERENCE, TURBULENCE

Corrections de parois en soufflerie elliptique, par Lucien Malavard et Joseph Pérès. C. R. Acad. sci., Paris, May 10, 1937, v. 204, no. 19, p. 1400-1401. diagrs.

Corrections de parois dans le cas d'un tunnel de section elliptique, par Lucien Malavard et Joseph Pérès. C. R. Acad. sci., Paris, Mar. 8, 1937, v. 204, no. 10, p. 740-42. illus.

Experimental investigation of wind tunnel interference in the downwash behind airfoil, by A. Silverstein and S. Katzoff. Washington, U.S. Govt. print. off., 1937. 7 p. bibliog., diagrs., illus. (N.A.C.A. Report no. 609)

Measurements of intensity and scale of wind-tunnel turbulence and their number of spheres, by Hugh L. Dryden, G. B. Schubauer, W. C. Mock, Jr. and H. K. Skramstad. Washington, U.S. Govt. print. off., 1937. 31 p. illus. (N.A.C.A. Report no. 581) (Abstract Aircraft engineering, London, July 1937, v. 9, no. 101, p. 197)

Wind tunnel loss caused by wall friction, by W. Tripp and V. J. Skoglund. Journal of the aeronautical sciences, New York, Nov. 1936, v. 4, no. 1, p. 10-11. diagrs., illus.

Der Strahleinfluss bei offenen windkanälen, von F. Weinig. Luftfahrtforschung, München und Berlin, July 20, 1936, v. 13, no. 7, p. 210-13. illus.

Boundary interference of partially closed wind tunnels, by K. Kondo. Tokyo, Tokyo imperial university, 1936. 130 p. (Aeronautical research institute report no. 137) (Abstract Journal of the R.A.S., London, Sep. 1936, p. 71)

Scale effect and the wind tunnel, by Edward P. Warner. (In his Airplane design - performance. New York, McGraw-Hill book company, 1936. p. 24-27. diagrs., illus.)

Turbulence factors of N.A.C.A. wind tunnels as determined by sphere tests, by Robert C. Platt. Washington, U.S. Govt. print. off., 1936. 21 p. diagrs., illus., tables. (N.A.C.A. Report no. 558) (Abstract Journal of the R.A.S., London, Feb. 1937, p. 141)

Sur l'évaluation numérique de la turbulence des souffleries aérodynamiques, par Adrien Foch. C.R. Acad. sci., Paris, Dec. 30, 1935, v. 201, no. 27, p. 1462-63. (Abstract Journal of the R.A.S., London, Jan. 1937, p. 15)

WIND TUNNELS

L'Influsso della limitazione della corrente sulle caratteristiche dei modelli di ali, di E. Pistolesi. L'Aerotecnica, Roma, July-Aug. 1935, v. 15, no. 7-8, p. 697-734. diagr. (Abstract Aero digest, New York, Jan. 1936, v. 28, no. 1, p. 66)

Influence des parois et des surfaces libres sur les valeurs expérimentales dans le cas du biplan d'envergure finie, par M. Ménadovitch. La Technique aéronautique, Paris, 1935, 2e trimestre, v. 26, no. 136, p. 112-20. diagrs., tables.

On the wall interference of a circular wind tunnel, by K. Terazawa. Tokyo, Tokyo imperial university, 1935. 5 p. (Aeronautical research institute report no. 122)

Two notes on the boundary influence of wind tunnels of circular cross section, by I. Tani and M. Taima. Tokyo, Tokyo imperial university, 1935. 27 p. diagrs. (Aeronautical research institute report no. 121)

Wall interference of wind tunnels with boundaries of circular arcs, by K. Kondo. Tokyo, Tokyo imperial university, 1935. 65 p. (Aeronautical research institute report no. 126)

Wind tunnel interference, by William F. Durand. (In his Aerodynamic theory. Berlin, J. Springer, 1935. v. 4, p. 296-301. diagrs., tables.)

Wind-tunnel interference with particular reference to off-center positions of the wing, and to the downwash at the tail, by Abe Silverstein and James A. White. Washington, U.S. Govt. print. off., 1935. 13 p. (N.A.C.A. Report no. 547)

Aerodynamics - wind tunnel interference, by E. F. Relf and F. C. Johansen. (In R.A.S. handbook of aeronautics. London, Sir Isaac Pitman, 1934. p. 11, 108. diagrs., tables)

Experimental verification of the theory of wind-tunnel boundary interference, by Theodore Theodorsen and Abe Silverstein. Washington, U.S. Govt. print. off., 1934. 17 p. diagrs., illus., tables. (N.A.C.A. Report no. 478) (Abstract Journal of the R.A.S., London, Feb. 1935, p. 169)

The Small wind tunnel of the D.V.L., by F. Seewald. Washington, 1934. 8 p. (N.A.C.A. Technical memorandums no. 734) (From Z.F.M., München und Berlin, Oct. 28, 1933, v. 24, p. 559-62)

INTERFERENCE, TURBULENCE

Turbulence tests on the R.A.E. wind tunnels, by R. G. Harris and A. Graham. London, H. M. Stat. off., 1934. 6 p. diagrs., tables. (A.R.C. R. & M. no. 1662)

Wall interference and depth effect in the R.A.E. seaplane tank and scale effect tests on hulls of three sizes, by L. R. Coombes, W. G. A. Perring, D. W. Bottle and L. Johnston. London, H. M. Stat. off., 1934. 30 p. diagrs., illus. (A.R.C. R. & M. no. 1649)

Wind tunnel wall interference on pitching moments of large models in duplex tunnel, by W. L. Cowley and G. A. McMillan. London, H. M. Stat. off., 1934. 13 p. diagrs., tables. (A.R.C. R. & M. no. 1639) (Abstract Aero digest, New York, Jan. 1936, v. 28, no. 1, p. 67)

Interference due to walls of a wind tunnel, by L. Rosenhead. Proceedings of the Royal society of London, Oct. 2, 1933, v. 142A, p. 306-20. diagrs., tables.

The Effect of turbulence. An investigation of maximum lift coefficient and turbulence in wind tunnels and in flight, by C. B. Millikan and A. L. Klein. Aircraft engineering, London, Aug. 1933, v. 5, no. 54, p. 169-74. diagrs., illus.

The Aerofoil in a wind tunnel of elliptic section, by L. Rosenhead. Proceedings of the Royal society of London, June 1, 1933, v. 140, no. A 842, p. 579-604. diagrs., tables.

Wall interference of wind tunnel of elliptical cross section, by I. Tani and M. Sanuki. Journal of the Society of mechanical engineers of Japan, Tokyo, Feb. 1933, v. 36, no. 190, p. 123-27. diagr. (Also Proceedings of the Physicomathematical society of Japan, Tokyo, Nov. 1932, ser. 3, v. 14, no. 10, p. 592-603)

Attaining a steady air stream in wind tunnels, by Ludwig Prandtl. Washington, 1933. 34 p. diagrs., tables. (N.A.C.A. Technical memorandums no. 726) (From Handbuch der experimentalphysik, Leipzig, 1932, v. 4, pt. 2, p. 65-106)

Interference of a wind tunnel on a symmetrical body, by H. Glauert. London, H. M. Stat. off., 1933. 8 p. diagrs., tables. (A.R.C. R. & M. no. 1544)

Interference on an airfoil of finite span in an open rectangular wind tunnel, by Theodore Theodorsen. Washington, U.S. Govt. print. off., 1933. 4 p. (N.A.C.A. Report no. 461)

WIND TUNNELS

Use of networks to introduce turbulence unto a wind tunnel, by E. Ower and R. Warden. London, H. M. Stat. off., 1933. 8 p. diagrs. (A.R.C. R. & M. no. 1559)

Wind tunnel interference on wings, bodies and airscrews, by H. Glauert. London, H. M. Stat. off., 1933. 75 p. diagrs., tables. (A.R.C. R. & M. no. 1566)

Comparaison entre les corrections de parois dans les souffleries de section rectangulaire et de section circulaire, par A. Toussaint et H. Girerd. C.R. Acad. sci., Paris, Oct. 17, 1932, v. 195, no. 16, p. 645-47.

Der Windkanal der Focke-Wulf flugzeugbau A.G., von H. Focke. Z.F.M., Berlin, June 14, 1932, v. 25, no. 11, p. 305-08. diagrs., illus. (Translated Aircraft engineering, London, Sep. 1932, v. 4, no. 43, p. 219-20)

Flow of compressible fluid in the neighbourhood of the throat of a constriction in a circular wind channel, by S. G. Hooker. London, H. M. Stat. off., 1931. 9 p. diagrs., tables. (A.R.C. R. & M. no. 1429) (Also Proceedings of the Royal society of London, Mar. 1, 1932, v. 135, no. A 827, p. 498-511) (Abstract Journal of the R.A.S., London, June 1932, p. 495)

The Interference on the characteristics of an aerofoil in a wind tunnel of circular section, by H. Glauert. London, H. M. Stat. off., 1932. 12 p. (A.R.C. R. & M. no. 1453)

The Interference on the characteristics of an aerofoil in a wind tunnel of rectangular section, by H. Glauert. London, H. M. Stat. off., 1932. 7 p. diagrs., tables. (A.R.C. R. & M. no. 1459)

The 7 by 10 foot wind tunnel of the N.A.C.A., by T. A. Harris. Washington, U.S. Govt. print. off., 1932. 9 p. diagrs., illus. (N.A.C.A. Report no. 412) (Abstract Journal of the R.A.S., London, Oct. 1932, p. 898)

Some general theorems concerning wind tunnel interference on aerofoils, by H. Glauert. London, H. M. Stat. off., 1932. 11 p. illus. (A.R.C. R. & M. no. 1470)

The Theory of wind-tunnel wall interference, by Theodore Theodorsen. Washington, U.S. Govt. print. off., 1932. 11 p. diagrs., tables. (N.A.C.A. Report no. 410) (Abstract Journal of the R.A.S., London, Oct. 1932, p. 898)

Wind tunnel boundary effects, by Elliott Gray Reid. (In his Applied wing theory. New York, McGraw-Hill book company, inc., 1932. p. 176-87. diagrs., tables.)

INTERFERENCE, TURBULENCE

Wind tunnel interference on aerofoils, by H. Glauert. London, H. M. Stat. off., 1932. 11 p. diagrs., tables. (A.R.C. R. & M. no. 1470)

Versuche an einem windkanalmodell, von M. Schilhansl. Z.F.M., Berlin, Feb. 28, Mar. 14, 1931, v. 22, no. 4, 5, p. 107-17; 149-59. diagrs., illus., tables. (Also Jahrbuch der D.V.L., München und Berlin, 1931, p. 23-35)

The Design of wind tunnels, by E. F. Relf. Aircraft engineering, London, Feb. 1931, v. 3, no. 24, p. 27-28, 34. diagrs., table.

Aerodynamics - wind tunnel interference, by E. F. Relf. (In Handbook of aeronautics. London, Gale and Polden, 1931. p. 142. diagrs., tables.)

On effect of the walls of a wind tunnel upon the lift coefficient of a model, by T. Sasaki. Tokyo, Tokyo imperial university, 1931. 27 p. diagrs., illus., tables. (Aeronautical research institute report no. 77)

Reduction of turbulence in wind tunnels, by Hugh L. Dryden. Washington, U.S. Govt. print. off., 1931. 11 p. diagrs., illus., tables. (N.A.C.A. Report no. 392) (Abstract Aircraft engineering, London, Jan. 1932, v. 4, no. 35, p. 3-6)

The Vertical wind tunnel of the National advisory committee for aeronautics, by Carl J. Wenzinger and Thomas A. Harris. Washington, U.S. Govt. print. off., 1931. 10 p. diagrs., illus. (N.A.C.A. Report no. 387) (Abstract Aircraft engineering, London, Feb. 1932, v. 4, no. 36, p. 29-31)

Wind tunnel interference on streamline bodies, by C. N. H. Lock and F. C. Johansen. London, H. M. Stat. off., 1931. 21 p. diagrs., illus., tables. (A.R.C. R. & M. no. 1451)

The Effect of wind tunnel interference on the characteristics of an aerofoil, by L. Rosenhead. Proceedings of the Royal society of London, Sep. 3, 1930, ser. A, v. 129, no. A 809, p. 135-45. diagrs., tables.

The New american wind tunnels, by R. McKinnon Wood. Journal of the R.A.S., London, July 1930, v. 34, no. 235, p. 559-68. diagrs. (Translated Notiziario tecnico di aeronautica, Roma, Oct. 1930, v. 6, no. 10, p. 29-37)

WIND TUNNELS

Effect of turbulence in wind tunnel measurements, by Hugh L. Dryden and Arnold M. Kuethe. Washington, U.S. Govt. print. off., 1930. 26 p. diagrs., illus., tables. (N.A.C.A. Report no. 342)

Experimental determination of jet boundary corrections for airfoil tests in four open wind tunnel jets of different shapes, by M. Knight and T. A. Harris. Washington, U.S. Govt. print. off., 1930. 27 p. diagrs., illus. (N.A.C.A. Report no. 361)

Wind channel walls interference, by F. G. Glass. Moscow, Scientific technical department of the Supreme council of national economy, 1930. 23 p. diagrs., tables. (C.A.H.I. Transactions no. 55) (Abstract L'Aerotecnica, Roma, June 1930, v. 10, no. 6, p. 500)

The Interference of a wind tunnel on a symmetrical body, by C. N. H. Lock. London, H. M. Stat. off., 1929. 18 p. diagrs., tables. (A.R.C. R. & M. no. 1275) (Abstract Aircraft engineering, London, July 1930, v. 2, no. 17, p. 188)

Investigation of air flow in open-throat wind tunnels, by Eastman N. Jacobs. Washington, U.S. Govt. print. off., 1929. 11 p. diagrs. (N.A.C.A. Report no. 322)

A Comparison of propeller and centrifugal fans for circulating the air in a wind tunnel, by Fred E. Weick. Washington, 1928. 7 p. diagrs., illus., tables. (N.A.C.A. Technical notes no. 281)

On improvement of air flow in wind tunnels, by C. Wieselsberger. Washington, 1928. 9 p. diagrs. (N.A.C.A. Technical memorandums no. 470) (From Journal of the Society of mechanical engineers of Japan, Tokyo, June 1925, v. 28, no. 98)

On the effect of the wall of a wind tunnel upon the lift coefficient of a model, by Tatudiro Sasaki. Tokyo, Tokyo imperial university, 1928. 45 p. diagrs., illus. (Aeronautical research institute report no. 46) (Also Proceedings of the Imperial academy of Japan, Tokyo, Oct. 1928, v. 4, no. 8, p. 481-84. illus.) (in japanese)

On the interference of wind tunnel walls of rectangular cross-section on the aerodynamical characteristics of a wing, by K. Terazawa. Tokyo, Tokyo imperial university, 1928. 12 p. (Aeronautical research institute report no. 44)

INTERFERENCE, TURBULENCE

Research on channel wall interference, by J. H. Parkin. Journal of the R.A.S., London, Dec. 1927, v. 31, no. 204, p. 1110-49. (Also Canadian engineer, Toronto, Apr. 10, 1928, v. 54, no. 15, p. 429-31)

The Effect of the walls in closed type wind tunnels, by George J. Higgins. Washington, U.S. Govt. print. off., 1927. 18 p. diagrs., illus., tables. (N.A.C.A. Report no. 275)

Study of open jet wind tunnel cones, by Fred E. Weick. Washington, 1927. 13 p. diagrs., illus. (N.A.C.A. Technical notes no. 260)

Variable density wind tunnel. Report of the scale effect panel. London, H. M. Stat. off., 1927. 4 p. diagrs. (A.R.C. R. & M. no. 1149)

Wall interference in closed type wind tunnels, by George J. Higgins. Washington, 1927. 6 p. diagrs. (N.A.C.A. Technical notes no. 256)

An Experimental investigation of the flow of air in a flat broadening channel, by A. N. Vedernikoff. Moscow, Scientific technical department of the Supreme council of national economy, 1926. 42 p. illus., diagrs., tables. (C.A.H.I. Transactions no. 21)

Investigation of turbulence in wind tunnels by a study of the flow about cylinders, by H. L. Dryden and R. H. Heald. Washington, U.S. Govt. print. off., 1926. 17 p. diagrs., illus. (N.A.C.A. Report no. 231)

On the effect of the walls of an experimental tank on the resistance of a model, by H. Lamb. London, H. M. Stat. off., 1926. 6 p. diagrs. (A.R.C. R. & M. no. 1010)

The Variable density wind tunnel of the National advisory committee for aeronautics, by Max M. Munk and Elton W. Miller. Washington, U.S. Govt. print. off., 1926. 18 p. diagrs., illus. (N.A.C.A. Report no. 227)

The Effect of wind-tunnel interference on a combination of airscrew and tractor body, by C. N. H. Lock and E. H. Bateman. London, H. M. Stat. off., 1924. 6 p. diagrs., illus., tables. (A.R.C. R. & M. no. 919)

The Effect of wind-tunnel turbulence upon the forces measured on models, by W. L. Le Page and J. T. Nichols. Washington, 1924. 11 p. diagrs., tables. (N.A.C.A. Technical notes no. 191)

WIND TUNNELS

An Experimental test of the Prandtl correction for wall interference, by W. L. Cowley and L. J. Jones. London, H. M. Stat. off., 1924. 4 p. diagrs., tables. (A.R.C. R. & M. no. 898)

The Interference of wind channel walls on the downwash angle and the tailsetting to trim, by H. Glauert and A. S. Hartshorn. London, H. M. Stat. off., 1924. 9 p. diagrs., tables. (A.R.C. R. & M. no. 947)

The Interference of wind channel walls on the aerodynamic characteristics of an aerofoil, by H. Glauert. London, H. M. Stat. off., 1923. 7 p. (A.R.C. R. & M. no. 867)

Model supports and their effect on the results of wind tunnel tests, by David L. Bacon. Washington, 1923. 7 p. (N.A.C.A. Technical notes no. 130)

On wind tunnel discrepancies. Aeroplane, London, Apr. 20, 1921, v. 20, no. 16, p. 380.

Description of improved moments measuring apparatus for tests on models in the wind channel, with an appendix on the determination of correction, due to interference of apparatus of model, by L. W. Bryant and H. B. Irving. London, H. M. Stat. off., 1915-1916. 5 p. diagrs. (A.R.C. R. & M. no. 192)

METHODS, OPERATION

Notes on the proceedings of the 1939 meeting of the aircraft industry with the National advisory committee for aeronautics. Journal of the aeronautical sciences, New York, May 1939, v. 6, no. 7, p. 299-301. illus. (Also Aero digest, New York, June 1939, v. 34, no. 6, p. 55-56, 136) (Abstract News-week, Dayton, Ohio, May 15, 1939, v. 13, p. 26)

Korrekturfaktoren für windkanäle elliptischen querschnitts mit teilweise offener und teilweise geschlossener messtrecke, von F. Riegels. Luftfahrtforschung, München und Berlin, Jan. 10, 1939, v. 16, no. 1, p. 26-30. diagrs., tables.

Some results from the "Deutsche forschungsanstalt für segelflug" smoke tunnel, by A. Lippisch. London, R.A.S. preprint for meeting, Dec. 15, 1938. 8 p. diagr., illus. (Abstract Aeroplane, London, Dec. 28, 1938, v. 55, p. 849-53)

METHODS, OPERATION

La Costruzione delle gallerie aerodinamiche di Guidonia, di Salvatore Cannavo. Annali dei lavori pubblici, Roma, Sep. 1938, v. 76, no. 9, p. 741-55. diagrs., illus.

Méthode expérimentale pour l'étude en soufflerie de l'interaction au sol. Note de Louis Viaud. C. R. Acad. sci., Paris, Mar. 14, 1938, v. 206, no. 11, p. 817-19. diagrs.

Der Vergrösserte N.A.C.A. Schleppkanal und einiges über seine arbeitsweise, von Starr Truscott. (In Jahrbuch der deutschen luftfahrtforschung, ergänzungsband, München und Berlin, R. Oldenbourg, 1938. p. 374-95. diagrs., illus., tables)

The New N.A.C.A. gust tunnel. Journal of the aeronautical sciences, New York, June 1937, v. 4, no. 8, p. 342.

Test methods involved in the operation of a commercial wind tunnel, by B. G. Eaton, Jr. Aero digest, New York, Apr. 1937, v. 30, no. 4, p. 28-29, 46, 100. diagrs., illus.

Sur la représentation du sol dans les essais aérodynamiques de véhicules, par F. Gruson. C. R. Acad. sci., Paris, Feb. 15, 1937, v. 204, no. 7, p. 473-75. illus.

Untersuchung eines windkanals, von S. Hoerner. Luftfahrtforschung, München, Jan. 20, 1937, v. 14, no. 1, p. 36-43. diagrs., illus., tables.

Wind tunnel experiment-nature of wind tunnel work, by Norman A. V. Piercy. (In his Aerodynamics. London, The English universities press, ltd., 1937. p. 64-94. diagrs., tables)

Bauarten, eigenschaften und leistungen von windkanälen, von S. Hoerner. Zeitschrift des V.D.I., Berlin, Aug. 8, 1936, v. 80, no. 32, p. 949-57. bibliog., diagrs., tables. (Abstract Journal of the aeronautical sciences, New York, Feb. 1937, v. 4, no. 4, p. 169)

Méthode simplifiée pour le calcul des réactions sur le manche, par R. Pesek. L'Aéronautique, Paris, Apr. 1936, v. 18, no. 160, p. 41-46. diagrs.

Laboratorium versuchstechnik, von E. von Angerer. Braunschweig, Vieweg und sohn, 1936. 201 p. illus.

Rendiconti sperimentali del laboratorio di aeronautica del R. Istituto superiore di ingegneria di Torino. L'Aerotecnica, Roma, Nov.-Dec. 1935, v. 15, no. 11-12, p. 979-1036.

WIND TUNNELS

Application d'une méthode de recherches utilisant des fumées à l'étude des congés de raccordement aile-fuselage, par Jacques Valensi. L'Aéronautique, Paris, July 1935, v. 17, no. 194, p. 179-82. diagrs., illus.

A High-speed wind tunnel. Aircraft engineering, London, June 1935, v. 7, no. 76, p. 138.

Experimental methods: wind tunnels, by A. Toussaint and E. N. Jacobs. (In Aerodynamic theory, by William F. Durand. Berlin, Julius Springer, 1935. p. 251-350. diagrs., illus., tables)

Comparison of ground-plan and image methods for representing ground effects in vehicle models, by R. H. Heald. Bureau of standards journal of research, Washington, Dec. 1934, v. 13, no. 6, p. 863-70.

A Belt method of representing the ground, by Alexander Klemin. Journal of the aeronautical sciences, New York, Oct. 1934, v. 1, no. 4, p. 198-99. illus.

A Reflection plate representing the ground, by E. A. Stalker. Journal of the aeronautical sciences, New York, July 1934, v. 1, no. 3, p. 151.

De l'importance des recherches aérodynamiques; la construction aéronautique americaine, par Robert Boname. La Technique aéronautique, Paris, 1934, v. 25, no. 131, p. 32-45.

Condizioni e tendenze dell'aerodinamica sperimentale, di A. Eula. L'Aerotecnica, Roma, Aug.-Sep. 1933, v. 13, no. 8-9, p. 1021-27; 1181-92. (Abstract Journal of the R.A.S., London, June 1934, p. 540)

Attaining a steady air stream in wind tunnels, by L. Prandtl. Washington, 1933. 34 p. bibliog., diagrs., tables. (N.A.C.A. Technical memorandums no. 726) (From Handbuch der experimentalphysik, Leipzig, 1932, v. 4, pt. 2, p. 65-106)

Methods of visualizing air flow with observations on several aerofoils in the wind tunnel, by K. W. Clark. London, H. M. Stat. off., 1933. 10 p. diagrs., illus. (A.R.C. R. & M. no. 1552)

Aérodynamique expérimentale. Étalonnage d'une soufflerie pour faibles vitesses, par Ch. Sadron. C. R. Acad. sci., Paris, Oct. 17, 1932, v. 194, no. 16, p. 647-49.

De l'utilisation d'hélices ventilateurs à pales orientables pour le réglage de la vitesse du vent dans une soufflerie système Eiffel, par Jacques Valensi. C.R. Acad. sci., Paris, July 4, 1932, v. 195, no. 1, p. 28-30.

METHODS, OPERATION

Smoke investigation of air flow, by W. S. Farren. Aircraft engineering, London, July 1932, v. 4, no. 41, p. 169-70.

Der Windkanal der Focke-Wulf flugzeugbau A. G., von H. Focke. Z.F.M., München und Berlin, June 14, 1932, v. 23, no. 11, p. 305-08. diagrs., illus. (Abstract Journal of the R.A.S., London, Oct. 1932, p. 899)

Il Laboratorio aerodinamico della direzione superiore studi ed esperienze del Ministero dell'aeronautica, di A. Eula. L'Aerotecnica, Roma, Feb. 1932, v. 12, no. 2, p. 143-66. diagrs., illus.

Venturi wind tunnel number 1; pt. II. Design, construction and tests of new tunnel propeller, by F. K. Kirsten and Robert C. Davis. Seattle, University of Washington, 1932. 26 p. diagrs., illus., tables. (Engineering experiment station bulletin no. 62)

How a wind tunnel works. Western flying, Los Angeles, Cal., Apr. 1931, v. 9, no. 4, p. 29. illus.

Nine-foot wind tunnel at New York University, by F. K. Teichman and B. F. Ruffner. Daniel Guggenheim school of aeronautics technical notes, New York, 1931, no. 1, p. 7-12. diagrs.

Vacuum-tube control for electric wind-tunnel balances, by Fred S. Eastman. Seattle, University of Washington, 1931. 16 p. illus. (Engineering experiment station bulletin no. 35)

Ventilation of 24-ft. wind tunnel, by B. Lockspeiser. London, H. M. Stat. off., 1931. 10 p. diagrs. (A.R.C. R. & M. no. 1372) (Abstract L'Aerotecnica, Roma, Mar. 1932, v. 12, no. 3, p. 394)

Venturi wind tunnel number 1. Part 1 - Design, construction, calibration, by Frederick K. Kirsten, Harold L. Adams and Richard L. Stith. Seattle, University of Washington, 1931. 79 p. bibliog., diagrs., illus., tables. (Engineering experiment station bulletin no. 57)

Aerodynamics for engineers, by Norman A. V. Piercy. Aircraft engineering, London, Nov. 1930, v. 2, no. 21, p. 275-77, 80. diagrs.

Constant speed wind tunnel control, by E. L. Judkins. Aviation, New York, Oct. 1930, v. 29, no. 4, p. 247.

Laboratory methods applied to the art of flying. Dun's international review, New York, Mar. 1930, v. 55, p. 42-43. illus.

WIND TUNNELS

Wind tunnel anomalies, by T. N. de Bobrovsky. Aviation engineering, East Stroudsburg, Pa., Jan. 1930, v. 3, no. 1, p. 15-16, 24.

Calibration constant of Wright Field five-foot wind-tunnel, by D. M. Borden. Washington, U.S. Govt. print. off., 1930. 17 p. (Air corps information circular no. 643)

French wind tunnel methods, by A. Lapresle. Journal of the R.A.S., London, Oct. 1929, v. 33, no. 226, p. 838-77. diagrs., illus. (Also Aeroplane, London, Apr. 24, 1929, v. 36, no. 17, p. 660)

Motor control for wind tunnel. Precision speed regulation for the wind tunnel motor at California institute of technology, by William A. Lewis. Journal of the American institute of electrical engineers, New York, Sep. 1929, v. 48, no. 9, p. 686-91. diagrs., illus.

Theory and practice in aviation, by S. R. Halley. Black Hills engineer, Rapid City, South Dakota, Mar. 1929, v. 16, no. 2, p. 89-91.

Correction of wind tunnel observation, by Max M. Munk. (In his Fundamentals of fluid dynamics for aircraft designers. New York, Ronald Press company, 1929. p. 128-30. diagrs., tables.)

Making aircraft airworthy, by K. M. Painter. Popular mechanics, Chicago, Oct. 1938, v. 50, no. 4, p. 480-85. illus.

Flygtekniska laboratorier, av I. Malmer. Stockholm, Ingeniörs vetenskaps akademien, 1928. 34 p. diagrs., illus. (Meddelande no. 82)

On improvement of airflow in wind tunnels, by C. Wieselsberger. Washington, 1928. 15 p. diagrs., illus. (N.A.C.A. Technical memorandums no. 470) (From Journal of the Society of mechanical engineers of Japan, Tokyo, June 1925, v. 28, no. 98)

Method of correcting wind tunnel data for omitted parts of airplane models, by R. H. Smith. Washington, 1927. 10 p. illus. (N.A.C.A. Technical notes no. 254)

Wire suspensions in wind tunnel experiments, by Jean Kerneis. Washington, 1925. 14 p. illus. (N.A.C.A. Technical memorandums no. 342) (From L'Aérophile, Paris, Sep. 1-15, 1925, v. 33, p. 267-72)

METHODS, OPERATION

Expérience sur la détermination de la puissance motrice nécessaire au fonctionnement d'une soufflerie, par S. Ziembinski. L'Aérophile, Paris, Aug. 1, Sep. 15, 1924, v. 32, p. 246-50; 280-83. illus.

The Airfoil: the wind tunnel; its operation, by Charles N. Monteith. (In his Simple aerodynamics and the airplane. Dayton, Ohio, McCook Field, 1924. p. 22-66. diagrs.)

Standardization of methods of research, by Richard Glazebrook. Flight, London, June 28, 1923, v. 15, no. 26, p. 347-50. illus.

The Co-relation of model and full scale work, by R. McKinnon Wood. Aeronautical journal, London, Dec. 1922, v. 26, no. 144, p. 480-97, 497-501. illus.

Langley Field wind tunnel motor regulation; N.A.C.A. develops motor regulator which practically solves problem of constant propeller speed in wind tunnel, by David L. Bacon. Aviation, New York, Feb. 6, 20, 1922, v. 12, p. 171, 226-27; 152-53. (Also Aerial age, New York, Feb. 6, 1922, v. 14, no. 22, p. 518-19)

Aeronautic research, by Joseph S. Ames. Journal of the Franklin institute, Philadelphia, Pa., Jan. 1922, v. 193, no. 1, p. 381-89.

Langley Field wind tunnel apparatus: Part I - Regulations for speed of wind tunnel drive motor. Part II - A Vernier manometer with adjustable sensitivity, by David L. Bacon. Washington, 1922. 9 p. (N.A.C.A. Technical notes no. 81)

A New method of testing models in wind tunnel, by V. Margoulis. Washington, 1921. 19 p. diagrs. (N.A.C.A. Technical notes no. 52) (From C.R. Acad. sci., Paris, Nov. 22, 1920, v. 171, no. 31, p. 997-99) (Abstracts Aerial age, New York, Sep. 26, 1921, v. 14, no. 3, p. 58-61 and Aeronautics, London, Dec. 9, 1920, v. 19, no. 373, p. 412-13)

High efficiency air flow, by F. W. Caldwell and E. N. Fales. Journal of the American society of heating and ventilating engineers, New York, May 1920, v. 26, no. 4, p. 403-14. illus.

Experimental methods - wind tunnels, by G. P. Thomson. (In his Applied aerodynamics. London, Hodden and Stoughton company, 1920. p. 34-55. diagrs., illus.)

Wind tunnel experimentation, by Alexander Klemin. Aviation, New York, Sep. 15, 1919, v. 7, no. 4, p. 177-80. diagrs., tables.

WIND TUNNELS

Units employed in recording the results of wind tunnel experiments. Flight, London, Jan. 25, 1917, v. 9, no. 3, p. 83-84.

The New four-foot wind channel; with description of the weighing mechanism employed in the determination of forces and moments, by L. Bairstow, J. H. Hyde and Harris Booth. London, H. M. Stat. off., 1913. 13 p. diagrs., illus., tables. (A.R.C. R. & M. no. 68)

TYPES - ELLIPTICAL

Korrekturfaktoren für windkanäle elliptischen querschnitts, mit teilweise offener und teilweise geschlossener messtrecke, von F. Riegels. Luftfahrtforschung, München und Berlin, Jan. 10, 1939, v. 16, no. 1, p. 26-30. diagrs., tables.

Correction de soufflerie en veine elliptique, par Lucien Malavard. C. R. Acad. sci., Paris, Dec. 12, 1938, v. 207, no. 24, p. 1168-71. diagrs.

Largest british private wind-tunnel opened. Aircraft, Melbourne, Australia, Dec. 1, 1938, v. 17, no. 3, p. 35. diagrs.

The New Fairey research laboratories. Aeroplane, London, Nov. 2, 1938, v. 55, no. 1432, p. 531-33. illus.

A Factory with its own Farnborough. Flight, London, Oct. 27, 1938, v. 35, no. 1557, p. 362. illus.

Corrections de parois en soufflerie elliptique, par Lucien Malavard et Joseph Pérès. C.R. Acad. sci., Paris, May 10, 1937, v. 204, no. 19, p. 1400-01. diagrs., illus.

Corrections de parois dans le cas d'un tunnel de section elliptique, par Lucien Malavard et Joseph Pérès. C.R. Acad. sci., Paris, Mar. 8, 1937, v. 204, no. 10, p. 740-42.

Grosser windkanal mit elliptischem querschnitt, von Max Kramer. Zeitschrift der V.D.I., Berlin, Dec. 21, 1935, v. 79, no. 51, p. 1529-31. diagrs., illus.

Wall interference of wind tunnel of elliptical cross section, by I. Tani and M. Sanuki. Journal of the Society of mechanical engineers of Japan, Tokyo, Feb. 1933, v. 36, no. 190, p. 123-27.

TYPES - ELLIPTICAL

The Wall interference of a wind tunnel of elliptic cross-section, by Matao Sanuki and Itiro Tani. Proceedings of the Physico-mathematical society of Japan, Tokyo, Nov. 1932, ser. 3, v. 14, no. 10, p. 592-93. diagrs.

TYPES - FREE FLIGHT

Industry inspects N.A.C.A. Aviation, New York, June 1939, v. 38, no. 6, p. 52-53.

Notes on the proceedings of the 1939 meeting of the aircraft industry with the National advisory committee for aeronautics. Aero digest, New York, June 1939, v. 34, no. 6, p. 55-56, 136. (Also Journal of the aeronautical sciences, New York, May 1939, v. 6, no. 7, p. 299-301) (Abstract News-week, Dayton, Ohio, May 15, 1939, v. 13, p. 26)

Two N.A.C.A. wind tunnels dedicated; operators to work like "sand hogs." American aviation, Washington, May 15, 1939, v. 2, no. 24, p. 4.

Trudelwindkanal, von K. B. Kruger. Zeitschrift des V.D.I., Berlin, Apr. 29, 1939, v. 83, no. 17, p. 498. diagrs.

Il Canale verticale del vento dell'istituto di meccanica dei fluidi di Lilla e lo studio della vite degli aeromobili. L'Aerotecnica, Roma, Jan. 1939, v. 19, no. 1, p. 99-116. diagrs., illus., tables.

Que savons-nous de la "vrille" - souffleries verticales et laboratoires aérodynamiques, par C. Brochet. La Science et la vie, Paris, Oct. 1938, p. 9. illus.

La Soufflerie verticale de l'Institut de mécanique des fluides de Lille et l'étude de la vrille des avions, par J. D. Vagner. L'Aéronautique, Paris, July 1938, v. 20, no. 230, supp., p. 87-88. illus.

Eine Neue trudelmesseinrichtung, von M. Kramer und K. B. Kruger. Luftfahrtforschung, München und Berlin, Oct. 1937, v. 14, no. 10, p. 475-79. illus.

N.A.C.A.-freiflug-windkanal. Interavia, Geneva, Sep. 14, 1937, no. 471, p. 3. illus.

Free flight in a tunnel. Scientific american, New York, Aug. 1937, v. 157, no. 2, p. 98. illus.

Langley Field conference; small N.A.C.A. tunnel experiments, by Alexander Klemin. Aircraft engineering, London, July 1937, v. 9, no. 101, p. 191-93. illus.

WIND TUNNELS

Free-spinning wind tunnel (N.A.C.A.). Journal of the aeronautical sciences, New York, June 1937, v. 4, no. 8, p. 343.

Progress of research in 1929-1937. Review of developments in aircraft and engine design, by Henry Tizard. Aircraft engineering, London, June 1937, v. 9, no. 100, p. 157-58.

Visit to the Langley Field conference, by Alexander Klemin. Scientific american, New York, Aug. 1936, v. 155, p. 92-93. illus.

Preliminary tests in the N.A.C.A. free-spinning wind tunnel, by C. H. Zimmerman. Washington, U.S. Govt. print. off., 1936. 18 p. diagrs., illus., tables. (N.A.C.A. Report no. 557) (Abstract Journal of the R.A.S., London, Jan. 1937, p. 24)

Free spinning tunnel. Scientific american, New York, Sep. 1935, v. 153, p. 146. diagrs.

Wings under scrutiny; aeronautical laboratory demonstrates new vertical wind-tunnel. Literary digest, New York, June 8, 1935, v. 119, no. 23, p. 18. illus.

Senkrechter windkanal für trudelversuche, von R. H. Francis. Zeitschrift des V.D.I., Berlin, Jan. 19, 1935, v. 79, no. 3, p. 65-67. diagrs., illus.

Tunnel for spin study, by Alexander Klemin. Scientific american, New York, Nov. 1933, v. 149, p. 227-28. illus.

Nuovi impianti aerodinamici esteri. Studi e ricerche in Gran Brettagna. L'Aerotecnica, Roma, Nov. 1932, v. 12, no. 11, p. 1491-1513. diagrs., illus., tables. (Vertical wind tunnel of R.A.E. Farnborough)

Another vertical wind tunnel. The Sikorsky aircraft corporation's tunnel for spinning experiments at Bridgeport. Aircraft engineering, London, July 1932, v. 4, no. 41, p. 181. diagrs., illus.

New methods of research, by H. E. Wimperis. Flight, London, June 3, 1932, v. 24, no. 23 (1223), p. 482-86. illus. (Also Aircraft engineering, London, June 1932, v. 4, no. 40, p. 151-56)

Un Tunnel aérodynamique vertical. L'Aérophile, Paris, Jan. 1932, v. 40, no. 1, p. 25. illus.

Free model spinning researches, by A. V. Stephens. Aircraft engineering, London, Sep. 1931, v. 3, no. 31, p. 213-15.

TYPES - FREE FLIGHT

New type wind tunnel to test airplanes, by Anthony Wayne. National glider and airplane news, New York, Sep. 1931, v. 3, no. 2, p. 41. illus.

Why a vertical tunnel. Western flying, Los Angeles, Cal., Apr. 1931, v. 9, no. 4, p. 41. illus.

A New vertical wind tunnel, by D. E. Olshevsky. Aero digest, New York, Jan. 1931, v. 18, no. 1, p. 54-55. diagrs., illus.

The Vertical wind tunnel of the National advisory committee for aeronautics, by Carl J. Wenzinger and Thomas A. Harris. Washington, U.S. Govt. print. off., 1931. 10 p. diagrs., illus. (N.A.C.A. Report no. 387) (Abstract Aircraft engineering, London, Feb. 1932, v. 4, no. 36, p. 29-31)

TYPES - FULL SCALE

Comparison of profile drag and boundary layer measurements obtained in flight and in full-scale wind tunnel, by Harry J. Goett and Joseph Bicknell. Washington, 1939. 10 p. diagrs., illus., tables. (N.A.C.A. Technical notes no. 693)

The Development of aeronautical science. Engineering, London, May 27, 1938, v. 155, no. 3776, p. 599-600.

Wind tunnel at Chalais-Meudon, by S. Papadaki. Architectural record, New York, Feb. 1937, v. 81, p. BT 18-20. illus., plan.

The Behemoth of wind tunnels, by M. E. Joseph. Popular aviation, Chicago, Sep. 1936, v. 19, no. 3, p. 31-32, 60. illus.

The New U.S. wind tunnels, by R. McKinnon Wood. Aircraft engineering, London, Feb. 1930, v. 2, no. 12, p. 42-44. diagrs.

Some laboratory methods of aerodynamic investigations, by T. Tanner. Journal of the R.A.S., London, Apr. 1929, v. 33, no. 220, p. 319-24. diagrs., illus.

A High speed wind channel for tests on aerofoils (N.P.L.), by T. E. Stanton. London, H. M. Stat. off., 1928. 9 p. diagrs., tables. (A.R.C. R. & M. no. 1130)

Propeller studied in high speed tunnel. Aviation, New York, July 12, 1926, v. 21, no. 2, p. 61.

High-speed wind tunnels. Scientific american, New York, Oct. 1925, v. 133, p. 275-76. diagr., illus.

High velocity wind tunnels. Their application to ballistics, aerodynamics and aeronautics, by E. Huguenard. Washington, 1925. 29 p. illus. (N.A.C.A. Technical memorandums no. 318) (From La Technique aéronautique, Paris, Nov. 15-Dec. 15, 1924, no. 37-38)

WIND TUNNELS

Studies in high speed aerodynamic phenomena, by F. W. Caldwell and E. N. Fales. Automotive industries, Philadelphia, Pa., Aug. 28, 1919, v. 41, no. 9, p. 422-26. diagrs., illus.

TYPES - OPEN JET

Der Strahleinfluss bei offenen windkanälen, von F. Weinig. Luftfahrtforschung, München und Berlin, Oct. 10, 1938, v. 15, no. 10-11, p. 556-59. illus., tables.

Sull'interferenza della galleria aerodinamica con tratto libero, di E. Pistolesi. L'Aerotecnica, Roma, Nov. 1937, v. 17, no. 11, p. 924-34. diagrs., illus., tables. (Abstract Aircraft engineering, London, Sep. 1938, v. 10, no. 115, p. 290)

Construction and calibration of the V.P.I. wind tunnel, by N. W. Conner. Blacksburg, Va., Virginia Polytechnic institute, 1937. (Engineering experimental station bulletin, July 1937, v. 30, no. 9, p. 5-32)

The Conversion of the Stanton 3-inch high-speed wind tunnel to the open jet type, by A. Bailey and S. A. Wood. Proceedings of the Institution of mechanical engineers, London, Jan.-May 1937, v. 135, p. 445-66. diagrs., illus., tables.

German open jet wind tunnel. Engineering, London, Dec. 18, 1936, v. 142, p. 657-59. illus. (Abstracts Mechanical engineering, New York, Feb. 1937, v. 59, p. 116 and Journal of the aeronautical sciences, New York, Feb. 1937, v. 4, no. 4, p. 169)

Der Strahleinfluss bei offenen windkanälen, von F. Weinig. Luftfahrtforschung, München und Berlin, July 20, 1936, v. 13, no. 7, p. 210-13. illus.

Wind tunnel at Farnborough. Concrete and constructional engineering, London, May 1935, v. 30, no. 5, p. 293-96. illus.

Effect on static pressure along the axis on an open jet tunnel, by F. B. Bradfield and G. F. Midwood. London, H. M. Stat. off., 1935. 7 p. illus. (A.R.C. R. & M. no. 1695)

Contributo allo studio delle gallerie aerodinamiche a vena aperta, di L. Lazzarino. L'Aerotecnica, Roma, Mar. 1934, v. 14, no. 3, p. 245-54. (Abstract Journal of the R.A.S. London, Feb. 1935, p. 169)

TYPES - OPEN JET

National physical laboratory wind tunnels. Engineering, London, Sep. 1, 1933, v. 136, no. 3529, p. 209-11. diagrs.

The N.P.L. open jet wind tunnel, by A. R. Collar. London, H. M. Stat. off., 1933. 17 p. diagrs. (A.R.C. R. & M. no. 1569) (Abstracts Aircraft engineering, London, June 1934, v. 6, no. 64, p. 165-70 and Journal of the R.A.S., London, Feb. 1935, v. 39, no. 290, p. 170)

Der Windkanal im flugtechnischen institut der TH Braunschweig, von S. Hoerner. Z.F.M., Berlin, Aug. 27, 1932, v. 23, no. 16, p. 486-87. illus. (Abstract Journal of the R.A.S., London, May 1933, p. 462)

Der Windkanal der Focke-Wulf flugzeugbau A.G., von Heinrich Focke. Z.F.M., Berlin, June 14, 1932, v. 23, no. 11, p. 305-08. diagrs., illus. (Abstracts Aircraft engineering, London, Sep. 1932, v. 4, no. 43, p. 219-20 and Journal of the R.A.S., London, Jan. 1933, v. 37, p. 94)

Investigation of open jet wind tunnels, by K. K. Baoulin, S. T. Astabatian and F. N. Krascheninnikov. Moscow, Scientific technical department of the Supreme council of national economy, 1932. 35 p. diagrs., illus. (C.A.H.I. Transactions no. 140)

Japanese wind tunnels. Engineering, London, May 29, 1931, v. 131, no. 3411, p. 689-90. diagrs., illus. (Also Aircraft engineering, London, Apr. 1931, v. 3, no. 26, p. 79)

National physical laboratory; aerodynamics department. Engineering, London, Aug. 8, 1930, v. 130, no. 3369, p. 168-69. diagrs., illus.

The 5-ft. open jet wind tunnel, R.A.E., by F. B. Bradfield. London, H. M. Stat. off., 1930. 11 p. diagrs., illus. (A.R.C. R. & M. no. 1364)

On the validity of large scale tests in an open jet wind tunnel, by W. G. A. Perring and C. Callen. London, H. M. Stat. off., 1930. 12 p. diagrs., tables. (A.R.C. R. & M. no. 1348) (Abstract Mechanical engineering, New York, May 1931, v. 53, p. 376)

Un Grave inconveniente dei tunnels aerodinamici aperti, di Emilio Herrera. (In IV Congresso internazionale di navigazione aerea, Roma, Oct. 24-30, 1927. Roma, 1928. v. 4, p. 117-24. illus.)

WIND TUNNELS

Study of open jet wind tunnel cones, by Fred E. Weick. Washington, 1927. 15 p. diagrs., illus. (N.A.C.A. Technical notes no. 260)

On the advantages of an open jet type of wind tunnel for air-screw tests, by H. Glauert and C. N. H. Lock. London, H. M. Stat. off., 1926. 10 p. diagrs. (A.R.C. R. & M. no. 1033)

TYPES - REFRIGERATED

A Menace overcome. Imperial airway gazette, London, Oct. 1938, v. 10, no. 10, p. 3. illus.

Icing of Pitot static tubes (B.F. Goodrich refrigerated wind tunnel), by Victor E. Carbonara and A. G. Binnie. Journal of the aeronautical sciences, New York, Aug. 1938, v. 5, no. 10, p. 400-03. diagrs., illus.

Der Kältewindkanal der aerodynamischen versuchsanstalt, Göttingen, von L. Ritz und H. Glaser. Luftwissen, Berlin, Jan. 1938, v. 5, no. 1, p. 13-14.

Unterdruck-tieftemperatur-windkanal Fiat, von C. Keller. Escher-Wyss-news, Zürich, July-Oct. 1935, v. 8, no. 4-5, p. 103-06. diagrs., illus.

Soufflerie d'essais de moteurs sous vide et à temperatures basses, des établissements Fiat à Turin, par C. Keller. Schweizer aero revue, Zürich, May 1935, v. 10, no. 5, p. 116-18.

Die Kälteanlage der D.V.L., von Georg Wollé. (In Jahrbuch der D.V.L., Berlin, R. Oldenbourg, 1931. p. 64-66. diagrs., illus.)

Goodrich refrigerated wind tunnel, by C. W. Leguillon. Aviation engineering, East Stroudsburg, Pa., Nov. 1930, v. 3, no. 11, p. 23-24.

TYPES - SMOKE

Some results from the "Deutsche forschungsanstalt für segelflug" smoke tunnel, by A. Lippisch. London, R.A.S. preprint for meeting, Dec. 15, 1938. 8 p. diagrs., illus. (Abstract Aeroplane, London, Dec. 28, 1938, v. 55, p. 849-53)

D. F. S. - rauchkanal. Flugsport, Berlin, Sep. 28, 1938, v. 30, no. 20, p. 539-42. illus.

TYPES-- SMOKE

Application d'une méthode de recherches utilisant des fumées à l'étude des congés de raccordement aile-fuselage, par Jacques Valensi. L'Aéronautique, Paris, July 1935, v. 17, no. 194, p. 179-82. diagrs., illus.

Methods of visualizing air flow with observations on several aerofoils in the wind tunnel, by K. W. Clark. London, H. M. Stat. off., 1933. 10 p. diagrs., illus. (A.R.C. R. & M. no. 1552)

Smoke investigation of air flow, by W. S. Farren. Aircraft engineering, London, July, 1932, v. 4, no. 41, p. 169-70.

Air flow with demonstrations on screen by means of smoke, by W. S. Farren. Journal of the R.A.S., London, June 1932, v. 36, p. 451-72.

Air flow (Farren's wind tunnel). Flight, London, Dec. 18, 1931, v. 23, no. 51, p. 1243-46. diagrs. (Also Aeroplane, London, Dec. 16, 1931, v. 41, no. 25, p. 1380-84)

TYPES - TOWING BASINS

Experimental apparatus and methods of measurement. Fluid mechanics panel of the British A.R.C. and collaborators. (In Modern developments in fluid dynamics. London, Oxford university press, 1939. v. 1-2. chap. 6)

Investigations and tests in the towing basin at Guidonia, by G. Cremona. Washington, 1939. 19 p. diagrs., illus., tables. (N.A.C.A. Technical memorandums no. 892)

Der Vergrösserte N.A.C.A. schleppkanal und einiges über seine arbeitsweise, von Starr Truscott. (In Jahrbuch der deutschen luftfahrtforschung, ergänzungsband. München und Berlin, R. Oldenbourg, 1938. p. 374-95. diagrs., illus., tables)

Der Wasserkanal des flugtechnischen institutes der technischen hochschule Berlin, von M. A. Müller. (In Jahrbuch der Deutschen luftfahrtforschung. München und Berlin, R. Oldenbourg, 1937. p. 778-79. diagr., illus.)

Le Centre des recherches aéronautiques de Guidonia (Italie), par B. Rabinovitch. L'Aérophile, Paris, Nov. 1936, v, 44, no. 11, p. 249-51.

WIND TUNNELS

An Experimental towing tank for small models, by K. S. M. Davidson. Transactions of the A.S.M.E. (Journal of applied mechanics), New York, 1936, v. 58, p. 41-46. diagrs., illus.)

Research in the R.A.E. tank, by L. P. Coombes. Journal of the R.A.S., London, Sep. 1935, v. 39, no. 297, p. 807-34. diagrs., illus. (Also Flight, London, Feb. 28, 1935, v. 27, no. 1366, p. 226a-c)

Seaplane models proved in half-mile tank; high-speed wind tunnel tests plane designs. Popular mechanics, Chicago, Mar. 1935, v. 63, p. 382-83. diagrs.

L'Istituto centrale aero-idrodinamico di Mosca ed i suoi lavori. L'Aerotecnica, Roma, June 1934, v. 14, no. 6, p. 724-41. diagrs., photos. (description of wind tunnel towing basin)

The Farnborough seaplane tank, by L. P. Coombes and W. G. A. Perring. Aircraft engineering, London, Mar. 1934, v. 6, no. 61, p. 63-66.

N.A.C.A. seaplane tank, by Starr Truscott. Aircraft engineering, London, Mar. 1934, v. 6, no. 61, p. 67-74.

The Test basin at Langley Field. Several test results, by Starr Truscott. Aircraft engineering, London, Mar. 1934, v. 6, no. 61, p. 7. diagrs., illus., photos.

Air ministry testing tank, by R. C. Mortimer. Engineer, London, Feb. 16, 1934, v. 157, p. 166-67, 174. illus.

The High speed tank of the Hamburg shipbuilding company, by G. Kempf and W. Sottorf. Washington, 1934. (N.A.C.A. Technical memorandums no. 735) (From Werft-reederei-hafen, Berlin, June 1, 1931)

Wall interference and depth effect in the R.A.E. seaplane tank and scale effect tests on hulls of three sizes, by L. P. Coombes, W. G. A. Perring, D. W. Bottle and L. Johnston. London, H. M. Stat. off., 1934. 30 p. diagrs., illus. (A.R.C. R. & M. no. 1649)

The Wave suppressors used in the N.A.C.A. tank, by Starr Truscott. Washington, 1934. 5 p. (N.A.C.A. Technical notes no. 513)

Experimental tank of Aichitokei-Denki and company, ltd., Zosen Kiokai, by T. Maki. Journal of the Society of naval architects of Japan, Tokyo (Zosen kiokai), Apr. 1933, v. 51, p. 61-75.

TYPES - TOWING BASINS

The N.A.C.A. tank: a high-speed towing basin for testing models of seaplane floats, by Starr Truscott. Washington, U.S. Govt. print. off., 1935. 16 p. (N.A.C.A. Report no. 470)

Langley Field conference, by Alexander Klemin. Mechanical engineering, New York, July 1932, v. 54, no. 7, p. 513-14.

Research equipment in Canada. A description of the wind tunnel and seaplane model tank at Ottawa, by J. H. Parkin. Aircraft engineering, London, Apr. 1932, v. 4, no. 38, p. 85-86. illus.

The Boeving devices, by R. E. Dowd. Aero digest, New York, Nov. 1931, v. 19, no. 5, p. 78-80. diagrs., illus.

Recent aircraft engineering research. Wide range of work reported at Langley Field conference in May--particulars of the new seaplane towing channel, 2040 ft. long at Langley Field, and also of the recently completed wind tunnel at that place, the only yet built in which full-sized airplanes can be tested, by Alexander Klemin. Mechanical engineering, New York, Aug. 1931, v. 53, no. 8, p. 594-98. illus.

N.A.C.A.'s great wind tunnel and towing basin at Langley Field. Aviation, New York, July 1931, v. 30, p. 404. illus.

Wind tunnel and seaplane basin at Langley Field. Science, New York, May 23, 1930, n.s., v. 71, no. 1847, supp. 10, p. 60.

Experiments with a model water tunnel, by E. N. Jacobs and I. H. Abbott. Washington, 1930. 10 p. diagrs., illus. (N.A.C.A. Technical notes no. 358)

The Stream tunnel, by Michael Watter. Aerial age, New York, Jan. 1925, v. 16, no. 1, p. 22.

With model basin and wind-tunnel; how our naval constructors check up their designs by means of miniature hulls and model airplanes. Scientific american, New York, July 30, 1921, v. 125, p. 82. illus.

TYPES - VARIABLE DENSITY

Industry inspects N.A.C.A. Aviation, New York, June 1939, v. 38, no. 6, p. 52-53.

WIND TUNNELS

Two N.A.C.A. wind tunnels dedicated; operators to work like "sand hogs." American aviation, Washington, May 15, 1939, v. 2, no. 24, p. 4.

Notes on the proceedings of the 1939 meeting of the aircraft industry with the National advisory committee for aeronautics. Journal of the aeronautical sciences, New York, May 1939, v. 6, no. 7, p. 299-301. illus. (Also Aero digest, New York, June 1939, v. 34, no. 6, p. 55-56, 137) (Abstract News-week, Dayton, Ohio, May 15, 1939, v. 13, p. 26)

Aerodynamic research at the National physical laboratory; atmospheric wind tunnels, by E. F. Relf. Journal of the aeronautical sciences, New York, Feb. 1939, v. 6, no. 4, p. 142-46. diagrs.

Large steel wind tunnel completed at M.I.T. Iron age, New York, Oct. 20, 1938, v. 142, no. 16, p. 28, 84. illus.

Wright-brothers high pressure wind tunnel. Aero digest, New York, Oct. 1938, v. 33, no. 4, p. 63. illus.

National physical laboratory; aerodynamics department. Engineering, London, Aug. 8, 1938, v. 130, no. 3369, p. 168-69. diagrs., illus.

Government to spend $1,000,000. Popular aviation, Chicago, July 1937, v. 21, no. 1, p. 30.

M.I.T. new wind tunnel as a memorial to Wright Brothers, by J. C. Hunsaker. Journal of the aeronautical sciences, New York, Apr. 1937, v. 4, no. 6, p. 262.

The Projected wind tunnel at the Massachussetts institute of technology, by J. C. Hunsaker. Scientific monthly, New York, Apr. 1937, v. 44, p. 390.

La Soufflerie "atmosphérique" des ateliers des Mureaux. Les Ailes, Paris, Nov. 12, 1936, p. 5-6. illus. (Abstract Journal of the aeronautical sciences, New York, Feb. 1937, v. 4, no. 4, p. 169)

Der Uberdruck-windkanal der aerodynamischen versuchsanstalt Göttingen, von H. Winter. Luftwissen, Berlin, Sep. 1936, v. 3, no. 9, p. 237-41. (Also Jahrbuch der deutschen luftfahrtforschung, Berlin, 1937, p. 574-77) (Abstracts Aircraft engineering, London, Dec. 1936, v. 6, no. 94, p. 335-36 and L'Aerotecnica, Roma, Apr. 1937, v. 17, no. 4, p. 352-53)

TYPES - VARIABLE DENSITY

Variable-density wind tunnel, Langley Field, by Bradley Jones. (In his Elements of practical aerodynamics. New York, John Wiley and sons, 1936. p. 21. illus.)

Research at the National physical laboratory, England (compressed air tunnel). Flight, London, June 13, 1935, v. 27, no. 1381, p. 641-42. diagrs.

The Compressed air wind tunnel (N.P.L.), by E. F. Relf. Cambridge university engineering and aeronautical society's journal, England, 1935, v. 10, p. 52-56. plates.

Compressed-air wind tunnel. Aeroplane, London, Nov. 7, 1934, v. 47, no. 1224, p. 553-54.

Electric aerodynamic balance (N.P.L.). Aircraft engineering, London, Sep. 1933, v. 5, no. 55, p. 200-02.

Testing airplanes without human risk. Compressed air magazine, Phillipsburg, N.J., May 1933, v. 38, no. 5, p. 4129. illus. (high-pressure wind tunnel at National physical laboratory at Teddington, England)

New compressed air tunnel at the National physical laboratory. Nature, London, Mar. 25, 1933, v. 131, no. 3308, p. 442.

High pressure wind tunnel at Teddington. Engineer, London, Mar. 17-24, 1933, v. 155, no. 4027-4028, p. 268-69; 291-93. diagrs., illus., plan.

The N.P.L.'s new density tunnel. Aeroplane, London, Mar. 15, 1933, v. 44, no. 11, p. 466. (Also Flight, London, Mar. 16, 1933, v. 25, no. 11, p.244)

Nuovi impianti aerodinamici esteri. L'Aerotecnica, Roma, Nov. 1932, v. 12, p. 1491-1513. diagrs., illus., tables.

National physical laboratory, aerodynamics department, wind tunnels. Engineering, London, Aug. 19, 1932, v. 134, no. 3475, p. 220-23. diagrs. (Non-turbulent compressed-air tunnel of the enclosed atmospheric type)

Wind tunnels, by Gordon S. Mitchell. Western flying, Los Angeles, June 1932, v. 11, no. 6, p. 14-16. diagr., illus.

The N.A.C.A. variable-density wind tunnel, by Eastman N. Jacobs and Ira H. Abbott. Washington, U.S. Govt. print. off., 1932. 12 p. diagrs., illus., tables. (N.A.C.A. Report no. 416)

WIND TUNNELS

Compressed-air wind tunnel of the National physical laboratory, by E. F. Relf. Aero digest, New York, Dec. 1931, v. 19, no. 6, p. 64. diagrs. (Also Engineering, London, Oct. 2-9, 1931, v. 132, no. 3429, p. 428-33, 470)

Variable density tunnel for the National physical laboratory, Teddington, by A. J. Grant. Engineer, London, Apr. 17, 24, 1931, v. 151, p. 427-29, 466-68. diagrs., illus.

Making a compressed-air tunnel. An account of the methods adopted in constructing the steel shell for the new tunnel at Teddington, by A. J. Grant. Aircraft engineering, London, Apr. 1931, v. 3, no. 26, p. 93-96. diagrs., illus.

Experiments on models of a compressed air wind tunnel (N.P.L.), by R. Jones and A. H. Bell. London, H. M. Stat. off., 1931. 22 p. diagrs., table. (A.R.C. R. & M. no. 1355) (Abstract L'Aerotecnica, Roma, Mar. 1932, v. 12, no. 3, p. 396)

National physical laboratory; aerodynamics department. Engineering, London, Aug. 8, 1930, v. 130, no. 3369, p. 168-69. diagrs., illus. (compressed air and open jet tunnels)

High-pressure aeronautical research tunnel - variable density tunnel. Engineer, London, June 20, 1930, v. 149, p. 695. illus. (Also Engineering, London, June 20, 1930, v. 129, p. 808) (tunnel manufactured by John Brown and co., Sheffield, erected at National physical laboratory at Teddington)

The New U.S. wind tunnels (N.A.C.A.), by R. McKinnon Wood. Aircraft engineering, London, Feb. 1930, v. 2, no. 12, p. 42-44. diagrs.

The Progress of aerodynamic research in 1929, by E. F. Relf. Aircraft engineering, London, Jan. 1930, v. 2, no. 11, p. 5, 6. (compressed air tunnel)

Exploration of the flow near the screw proposed for the N.P.L. compressed air tunnel, by C. N. H. Lock and A. R. Collar. London, H. M. Stat. off., 1930. 7 p. diagrs., tables. (A.R.C. R. & M. no. 1293)

Fundamental aerodynamics, by Charles N. Monteith. Aviation engineering, New York, Jan. 1929, v. 2, no. 1, p. 19-22.

Sphere drag tests in the variable density wind tunnel, by Eastman N. Jacobs. Washington, 1929. 10 p. diagrs. (N.A.C.A. Technical notes no. 312)

TYPES - VARIABLE DENSITY

Aircraft engineering conference. Aero digest, New York, June 1928, v. 12, no. 6, p. 940, 942.

Work in the variable density wind tunnel of the N.A.C.A., by Eastman N. Jacobs. Aviation, New York, Sep. 12, 1927, v. 23, no. 11, p. 620-23. diagrs., illus.

Variable density wind tunnel. Report of the scale effect. London, H. M. Stat. off., 1927. 4 p. diagrs. (A.R.C. R. & M. no. 1149)

The Variable density wind tunnel of the National advisory committee for aeronautics, by Max M. Munk and Elton W. Miller. Washington, U.S. Govt. print. off., 1926. 18 p. diagrs., illus., plans. (N.A.C.A. Report no. 227)

Un Tunnel à air comprimé. L'Aérophile, Paris, Nov. 1-15, 1924, v. 32, no. 21-22, p. 363. illus.

Midget wind tunnel that works like a giant (N.A.C.A.). Scientific american, New York, Nov. 1923, v. 129, no. 5, p. 333. diagrs., illus.

New wind tunnel in huge compressed air tank (N.A.C.A.) Popular mechanics, Chicago, Mar. 1923, v. 39, no. 3, p. 353. illus.

Recent aeronautic investigation and the airplane industry (compressed air wind tunnel), by Joseph S. Ames. Journal of the Franklin institute, Philadelphia, Feb. 1923, v. 195, no. 2, p. 145-65.

National advisory committee for aeronautics compressed air wind tunnel. Aerial age, New York, Jan. 1923, v. 16, no. 1, p. 8-9. illus.

Der Adlershofer höhenprüfstand, von K. Fr. Nägele. Z.F.M., München, May 17, 1921, v. 12, no. 9, p. 129-33. illus.

On a new type of wind tunnel, by Max M. Munk. Washington, 1921. 19 p. (N.A.C.A. Technical notes no. 60)

Der Hohenprüfstand des "Bureau of standards" in Amerika, von W. G. Noack. Z.F.M., Berlin, Mar. 15, 1920, v. 11, no. 5, p. 66-68.

USES

How and how not to use wind-tunnels. Aeroplane, London, Jan. 18, 1939, v. 56, p. 76-77.

WIND TUNNELS

The Use of wind tunnels, by F. B. Bradfield and D. L. Ellis. Flight, London, Jan. 12, 1939, v. 35, no. 1568, p. 43-46. diagrs., illus., tables.

Value of wind tunnel in aeronautical research and design, by G. W. Lewis. U.S. Air services, Washington, Oct. 1938, v. 23, no. 10, p. 25, 27. (Review Journal of the aeronautical sciences, New York, Dec. 1938, v. 6, no. 2, p. 77)

Wind tunnel experiment-nature of wind tunnel work, by Norman A. V. Piercy. (In his Aerodynamics. London, the English universities press, ltd., 1937. p. 64-94. diagrs., tables.)

La Construction et l'utilisation d'une soufflerie industrielle, par Robert Boname. L'Aéronautique, Paris, Aug. 1936, v. 18, no. 207, p. 165-73. diagrs., illus.

The Use of the wind tunnel in connection with aircraft-design problems, by Th. von Karman and Clark B. Millikan. Transactions of the A.S.M.E., New York, 1934, v. 56, p. 151-66. diagrs., illus. (Abstract L'Aerotecnica, Roma, Mar. 1935, v. 15, no. 3, p. 311)

Testing airplanes without human risk. Compressed air magazine, Phillipsburg, N.J., May 1933, v. 38, no. 5, p. 4129. illus.

High-school aerodynamics-use of the air tunnel. Industrial arts and vocational education, Milwaukee, Wis., Jan. 1933, v. 22, p. 13-16. diagrs.

Aeronautical experiments. Wind tunnel tests have solved many of the most baffling problems known to aeronautical science, by W. L. Marsh. Air and airways, London, Aug. 1932, v. 9, p. 173-75. illus.

Use of small wind tunnels in aeroplane design, by H. Glauert. Journal of the R.A.S., London, Mar. 1931, v. 35, no. 243, p. 207-30. diagrs. (Also Aeroplane, London, Dec. 10, 1930, v. 39, no. 25, p. 1366-68)

Il Tunnel aerodinamico per ricerche sui propulsori del comitato nazionale consultivo per l'aeronautica (N.A.C.A.). Rivista aeronautica, Roma, Feb. 1931, v. 7, no. 2, p. 331-43. diagrs., illus.

The Wind-tunnel as an engineering instrument, by A. L. Klein. S.A.E. journal, New York, July 1930, v. 27, no. 1, p. 87-90.

Laboratory method in aeronautics. Aero digest, New York, Dec. 1929, v. 15, no. 6, p. 57, 276. diagrs.

The Choice of a wind tunnel, by E. N. Fales and F. W. Caldwell. Aerial age, New York, Nov. 28, 1921, v. 14, no. 12, p. 270-72. diagrs.

Wind tunnels and airship model testing, by R. N. Wing. Aviation, New York, Aug. 15, 1920, v. 9, no. 2, p. 56-58. diagrs.

A Comparison of wind tunnels, by Matthew B. Sellers. Aeronautics, New York, Aug. 1913, v. 12, no. 2, p. 54.

Wind tunnel research, by Harris Booth. Aeronautical journal, London, Apr. 1912, v. 10, no. 62, p. 143-44.

SECTION III

ARTICLES, BOOKS AND PAMPHLETS - BY COUNTRY

BELGIUM

Les laboratoires aérodynamiques, par E. Allard. Schweizer aéro revue, Zürich, Aug. 25, 1938, v. 13, no. 16, p. 333-40. illus.

The Belgian aerotechnical laboratory at Rhode-Saint-Genèse. Washington, 1926. 8 p. illus. (N.A.C.A. Technical memorandums no. 377) (From Bulletin of the Technical service of aeronautics, Brussels, Jan. 1926)

The Aerodynamic laboratory of the belgian "service technique de l'aéronautique. Washington, 1924. 5 p. illus. (N.A.C.A. Technical memorandums no. 292)

CANADA

Early aeronautical research in Canada, by J. J. Green. Canadian aviation, Ottawa, Mar. 1937, v. 10, no. 3, p. 14, 15, 33. illus.

Aeronautical research in Canada, by J. J. Green, G. J. Klein and K. F. Tupper. New York, A.S.M.E. meeting, June 6-8, 1932. 9 p. diagrs., tables. (Miscellaneous papers no. 10)

Wind tunnels, by Gordon S. Mitchell. Western flying, Los Angeles, June 1932, v. 11, no. 6, p. 14-16. illus.

Research equipment in Canada. A description of the wind tunnel and seaplane model tank at Ottawa, by J. H. Parkin. Aircraft engineering, London, Apr. 1932, v. 4, no. 38, p. 85-86. illus.

Canada's new national aeronautic laboratories, by J. H. Parkin. S.A.E. journal, New York, Jan. 1932, v. 30, p. 15.

Aviation in Canada and national research laboratories, by J. H. Parkin. Engineering journal, Montreal, Nov. 1931, v. 14, no. 11, p. 564-70.

Testing of model planes in storms: wind tunnel at the National research council laboratories, by W. G. Vanderwater. Canadian engineer, Toronto, Apr. 14, 1931, v. 60, p. 26. illus.

Wind tunnels at Ottawa. Canadian engineer, Toronto, Dec. 2, 1930, v. 59, p. 687.

WIND TUNNELS

The Aeronautical laboratories of the National council of Canada, by J. H. Parkin. Engineering journal, Montreal, Feb. 1930, v. 13, no. 2, p. 95-103. diagrs.

Canadian aviation and the University of Toronto, by J. H. Parkin. Canadian aviation, Toronto, July 1928, v. 1, no. 2, p. 14-15, 44. diagrs.

University of Toronto wind channel, by J. H. Parkin. Canadian engineer, Toronto, Apr. 10, 1928, v. 54, no. 15, p. 429-31. illus.

Research on channel wall interference, by J. H. Parkin. Journal of the R.A.S., London, Dec. 1927, v. 31, no. 204, p. 1110-49.

The New aerodynamic laboratory of the University of Toronto, by J. H. Parkin. Journal of the Engineering institute of Canada, Montreal, Aug. 1927, v. 10, no. 8, p. 390-99. illus.

Aeronautical research. Canadian engineer, Toronto, Feb. 19, 1924, v. 46, no. 8, p. 255-56. illus.

The Toronto aerodynamic laboratory, by J. H. Parkin. Toronto, University of Toronto, 1921. (School of engineering, research bulletin no. 2, p. 10-15)

CHINA

The First chinese wind-tunnel. A description of the five-foot tunnel installed at Peiping University, by F. L. Wattendorf. Aircraft engineering, London, Oct. 1938, v. 10, no. 116, p. 317-18. illus.

ENGLAND - FARNBOROUGH - R.A.E.

The Development of aeronautical science. Engineering, London, May 27, 1938, v. 155, no. 3776, p. 599-600.

Progress of research in 1929-1937. Review of developments in aircraft and engine design, by Henry Tizard. Aircraft engineering, London, June 1937, v. 9, no. 100, p. 157-58.

La Soufflerie aérodynamique de Farnborough (Angleterre), par G. Balbachevsky. Technique des travaux, Paris, Mar. 1936, v. 12, no. 3, p. 126-32.

ENGLAND - FARNBOROUGH - R.A.E.

Cooling problems with particular reference to the work of the 24 ft. R.A.E. tunnel, by G. P. Douglas. Journal of the R.A.S., London, Feb. 6, 1936, v. 40, p. 102-22. diagrs. (Also Flight, London, Nov. 28, 1935, v. 28, no. 1405, p. 117-22)

Other world air powers (aircraft development in different countries; descriptions of wind tunnels in England, France, Germany, Italy, etc.). (In Aircraft year book, 1936. New York, Aeronautical chamber of commerce, inc., 1936. p. 33-60. illus.)

Reducing cooling drag, by G. P. Douglas. Flight, London, Nov. 21, 1935, v. 28, no. 1404, p. 524. illus.

Research in the R.A.E. tank, by L. P. Coombes. Journal of the R.A.S., London, Sep. 1935, v. 39, no. 297, p. 807-34. diagrs., illus. (Also Flight, London, Feb. 28, 1935, v. 27, no. 1366, p. 266a-c)

The Twenty-four-foot wind tunnel at Farnborough, by John E. Younger. Engineer, London, Apr. 5-12, May 17, 1935, v. 159, no. 4134, 4135, 4140, p. 351-53; 380-82; 386; 516-18, 519. diagrs., illus.

Twenty-four-foot wind tunnel at Farnborough; - fan drive; electric equipment. Engineer, London, May 24, 1935, v. 159, no. 4141, p. 534-37. (Also Flight, London, Apr. 10, 1935, v. 27, no. 1372, p. 380-83)

Twenty-four-foot wind tunnel at Farnborough. Main aerodynamic balance. Engineer, London, May 3, 1935, v. 159, no. 4138, p. 468-71. (Also Engineering, London, Apr. 12, 1935, v. 139, no. 3613, p. 396-97)

Wind tunnel at Farnborough. Concrete and constructional engineering, London, May 1935, v. 30, no. 5, p. 293-96. illus.

"Temple of the winds." Flight, London, Apr. 11, 1935, v. 27, no. 1372, p. 360-83. illus. (Also Aeroplane, London, Apr. 10, 1935, v. 48, no. 1246, p. 415-16)

Senkrechter windkanal für trudelversuche, von R. H. Francis. Zeitschrift des V.D.I., Berlin, Jan. 19, 1935, v. 79, no. 3, p. 65-67. diagrs., illus.

Preliminary calibration of the 24-foot wind tunnel, R.A.E., with a short description of the tunnel, by W. G. Jennings, A. Terry and P. J. Pearsall. London, H. M. Stat. off., 1935. 9 p. illus. (A.R.C. R. & M. no. 1720)

WIND TUNNELS

The Farnborough seaplane tank, by L. P. Coombes and W. G. A. Perring. Aircraft engineering, London, Mar. 1934, v. 6, no. 61, p. 63-66.

Air ministry testing tank, by R. C. Mortimer. Engineer, London, Feb. 16, 1934, v. 157, p. 166-67, 174. illus.

Turbulence tests of the R.A.E. wind tunnels, by R. G. Harris. and A. Graham. London, H. M. Stat. off., 1934. 6 p. diagrs., tables. (A.R.C. R. & M. no. 1662)

Wall interference and depth effect in the R.A.E. seaplane tank and scale effect tests on hulls of three sizes, by L. P. Coombes, W. G. A. Perring, D. W. Bottle and L. Johnston. London, H. M. Stat. off., 1934. 30 p. diagrs., illus. (A.R.C. R. & M. no. 1649)

Largest wind tunnel in Europe, by Oliver Stewart. Civil engineering, London, Dec. 1933, v. 28, no. 330, p. 444.

Studi e ricerche in Gran Bretagna. L'Aerotecnica, Roma, Nov. 1932, v. 12, no. 11, p. 1491-1513. diagrs., illus.

Measurements of intensity and scale of wind-tunnel turbulences and their relation to the critical Reynolds number of spheres, by Hugh L. Dryden, G. B. Schubauer and others. Washington, U.S. Govt. print. off., 1937. 31 p. illus. (N.A.C.A. Report no. 581)

Laboratory methods applied to the art of flying. Dun's international review, New York, Mar. 1930, v. 55, p. 42-45. illus.

Aeronautical research at the National bureau of standards, by L. J. Briggs. Aero digest, New York, Mar.-Apr. 1929, v. 14, no. 3-4, p. 47-49; 52-53, 290.

In the air on the ground, by G. H. Dacy. Popular aviation, Chicago, Oct. 1928, v. 3, no. 4, p. 18-20, 121. diagrs.

A New outdoor wind tunnel. Scientific american, New York, Aug. 1922, v. 127, no. 2, p. 93. illus.

Der Hohenprüfstand des "Bureau of standards" in Amerika, von W. G. Noack. Z.F.M., Berlin, Mar. 15, 1920, v. 11, no. 5, p. 66-68.

WIND TUNNELS

DISTRICT OF COLUMBIA - NAVY YARD

The 6-foot-4-inch wind tunnel at the Washington navy yard, by G. L. Desmond and J. A. McCrary. Washington, 1935. 15 p. illus. (N.A.C.A. Technical notes no. 536)

Making aircraft airworthy, by K. M. Painter. Popular mechanics, Chicago, Oct. 1928, v. 50, no. 4, p. 580-85. illus.

With model basin and wind-tunnel. (How our naval constructors check up their designs by means of miniature hulls and model airplanes) Scientific american, New York, July 30, 1921, v. 125, no. 5, p. 82. illus.

The Washington navy yard wind tunnel by which various aeronautical problems are solved. Scientific american, New York, Apr. 8, 1916, v. 81, no. 2101, p. 229. diagrs., illus.

U.S. Naval experimental wind tunnel at Washington navy yard, by William McEntee. International marine engineer, New York, Feb. 1916, v. 21, p. 64-65. diagrs., illus. (Also Scientific american, New York, Apr. 8, 1916, v. 81, p. 229 and Engineering news, New York, Apr. 13, 1916, v. 75, p. 697)

KANSAS - STATE AGRICULTURE COLLEGE

Letter to the editor regarding wind tunnels, by B. F. Gustafson. Journal of the aeronautical sciences, New York, Oct. 1938, v. 5, no. 12, p. 490. illus.

Full scale wind tunnel, by E. R. Dowley. Aviation, New York, Aug. 24, 1925, v. 19, no. 8, p. 212. illus.

MARYLAND - BERLINER-JOYCE CORPORATION

How a wind tunnel works. Western flying, Los Angeles, Cal., Apr. 1931, v. 9, no. 4, p. 29. illus.

Berliner-Joyce wind tunnel. Aero digest, New York, Nov. 1930, v. 17, no. 5, p. 86. illus.

MASSACHUSETTS - M.I.T.

Large steel wind tunnel completed at M.I.T. Iron age, New York, Oct. 20, 1938, v. 142, no. 16, p. 28, 84. illus.

UNITED STATES - MASSACHUSETTS - M.I.T.

Wright-brothers high pressure wind tunnel. Aero digest, New York, Oct. 1938, v. 33, no. 4, p. 63. illus.

M.I.T. new wind tunnel as a memorial to Wright brothers, by J. C. Hunsaker. Journal of the aeronautical sciences, New York, Apr. 1937, v. 4, no. 6, p. 262.

The Projected wind tunnel at the Mass. inst. tech., by J. C. Hunsaker. Scientific monthly, New York, Apr. 1937, v. 44, p. 390.

M.I.T. laboratory. Popular aviation, New York, Jan. 1929, v. 4, no. 1, p. 40, 108.

Aeronautics at M.I.T., by C. H. Chatfield. Aviation, New York, Oct. 6, 1928, v. 25, no. 15, p. 1099, 1114-15. diagrs.

Aeronautical work at M.I.T. Aviation, New York, Apr. 26, 1926, v. 20, no. 17, p. 630-31. diagrs.

New-type wind tunnel for airplane testing, by Bernard G. Priestley. Popular mechanics, Chicago, July 1922, v. 38, no. 1, p. 77-78. illus.

The Aerodynamical laboratory of the M.I.T., by Edward P. Warner. Aviation, New York, Mar. 13, 1922, v. 12, no. 11, p. 308-10. illus.

The New four-foot wind tunnel at the Massachusetts institute of technology, by William H. Miller and John R. Markham. Aerial age weekly, New York, Jan. 23, 1922, v. 14, no. 20, p. 472-73. illus.

Prices for wind tunnel tests at the Massachusetts institute of technology. Aerial age, New York, Jan. 23, 1922, v. 14, p. 463.

M.I.T. endowment campaign to develop aeronautical engineering course. Aviation, New York, Nov. 15, 1919, v. 7, no. 8, p. 354. illus.

Government again leases M.I.T. wind tunnel. Aircraft journal, New York, Nov. 8-15, 1919, v. 5, no. 19, p. 5. illus.

Reports on wind tunnel experiments in aerodynamics. 1. The wind tunnel of the Massachusetts institute of technology, by Jerome C. Hunsaker. Aerial age, New York, Mar. 6, 20, 27, 1916, v. 2-3, p. 596-97; 18-19; 60-61. illus. (Also Aeronautics, London, Mar. 8-15, 1916, v. 10, no. 125; 126, p. 159-61; 173-76; Technology monthly, Boston, 1916, v. 3, no. 1, 2, p. 9-13; 17-19 and Smithsonian institute, Wisconsin collections, Washington, 1916, v. 62, no. 4)

WIND TUNNELS

Recent experiments in aerodynamics. Aerial age, New York, Feb. 21, 1916, v. 2, no. 23, p. 546.

Aerodynamics experiments made in M.I.T. tunnel. Engineering news, New York, Dec. 9, 1915, v. 74, p. 1129.

Description of aerodynamic laboratory of the Massachusetts institute of technology, by J. C. Hunsaker. Scientific american, New York, June 5, 1915, v. 79, p. 364-65.

New aerodynamic balance installed in Massachusetts institute of technology. Aero and hydro, Chicago, Oct. 3, 1914, v. 9, no. 1, p. 5. illus.

MICHIGAN - DETROIT UNIVERSITY

Aircraft and automobile manufacturers test new models at the University of Detroit laboratories, by J. Geschelin. Automotive industries, Philadelphia, May 14, 1938, v. 78, p. 660-62. diagrs., illus.

A University wind tunnel. The Detroit single-return-flow open or closed experimental chamber tunnel described, by Rollin J. Fairbanks. Aircraft engineering, London, Oct. 1931, v. 3, no. 32, p. 252. illus.

MICHIGAN - UNIVERSITY OF MICHIGAN

An American wind tunnel. A description with an historical introduction of the 8-ft. tunnel at the University of Michigan, by Rollin J. Fairbanks. Aircraft engineering, London, June 1931, v. 3, no. 28, p. 147-48.

Another airwise college. Popular aviation, Chicago, May 1928, v. 2, no. 5, p. 24-27. diagrs.

The New wind tunnel, by F. W. Pawlowski. Michigan technic, Ann Arbor, Nov. 1927, v. 41, no. 1, p. 13-15. illus.

NEW YORK - CURTISS RESEARCH LABORATORY

Test methods involved in the operation of a commercial wind tunnel, by B. G. Eaton, Jr. Aero digest, New York, Apr. 1937, v. 30, no. 4, p. 28-29, 46, 100. diagrs., illus.

The New Curtiss wind tunnel. Curtiss-Wright review, New York, July 1931, v. 2, no. 3, p. 11. illus.

UNITED STATES - NEW YORK - CURTISS RESEARCH LABORATORY

Curtiss-Wright research plant at Garden City is laboratory for aircraft development, by A. B. Crofoot. Automotive industries, Philadelphia, Pa., Dec. 14, 1929, v. 61, no. 34, p. 864-66.

Absolute pressure gauge for wind tunnel use, by J. G. Coffin. Aviation, New York, Apr. 15, 1920, v. 8, no. 6, p. 236-37. illus.

Wind tunnel experimentation, by Alexander Klemin. Aviation, New York, Sep. 1, 1919, v. 7, no. 3, p. 132-35. diagrs., illus.

New Curtiss wind tunnel. Aerial age, New York, June 30, 1919, v. 9, no. 16, p. 768-69. illus.

Scientific research in aeroplane construction at the factory of the Curtiss aeroplane and motor corp. Aerial age weekly, New York, July 24, 1916, v. 3, no. 19, p. 562-68. illus.

NEW YORK - NEW YORK UNIVERSITY

A Belt method of representing the ground, by Alexander Klemin. Journal of the aeronautical sciences, New York, Oct. 1934, v. 1, no. 4, p. 198-99. illus., tables.

Nine-foot wind tunnel at New York university, by F. K. Teichman and B. F. Ruffner. New York, Daniel Guggenheim school of aeronautics, 1931. diagrs. (Technical notes no. 1, p. 7-12)

The N.Y. university wind tunnel, by William H. Miller. Aviation, New York, Mar. 1, 1926, v. 20, no. 9, p. 293-95. illus., tables.

OHIO - GOODRICH COMPANY

Icing of Pitot static tubes, by Victor E. Carbonara and A. G. Binnie. Journal of the aeronautical sciences, New York, Aug. 1938, v. 5, no. 10, p. 400-03. diagrs., illus., tables.

Goodrich refrigerated wind tunnel, by C. W. Leguillon. Aviation engineering, East Stroudsburg, Pa., Nov. 1930, v. 3, no. 11, p. 23-24.

WIND TUNNELS

OHIO - Mc COOK FIELD

Calibration constant of Wright Field five-foot wind tunnel. (difference between set-up 5 ft. wind tunnel at Wright Field and McCook Field), by D. M. Borden. Washington, U.S. Govt. print. off., 1930. 17 p. (Air corps information circular no. 643)

The New wind tunnel at McCook Field, by J. C. Branham. Aerial age, New York, June 1923, v. 16, no. 6, p. 291. (Also Aviation, New York, Apr. 23, 1923, v. 14, p. 450)

Description of McCook Field 5-foot wind tunnel, by E. N. Fales. Washington, U.S. Govt. print. off., 1922. 9 p. illus. (Air service information circular no. 341) (Also L'Aéronautique, Paris, Sep. 1921, v. 3, no. 28, p. 357-60)

The McCook Field wind tunnel. Aeronautics, London, July 28, 1921, v. 21, no. 406, p. 70-71.

Description of the McCook Field wind tunnel. Washington, U.S. Govt. print. off., 1921. 8 p. illus. (Air service information circular no. 196) (Abstract Aerial age, New York, June 13, 1921, v. 13, no. 14, p. 319-21)

Velocity determination in McCook Field wind tunnel. Washington, U.S. Govt. print. off., 1921. 4 p. diagrs. (Air service information circular no. 202) (Abstract Aerial age, New York, Aug. 15, 1921, v. 13, p. 542)

Tip-vortices shown by the McCook Field wind tunnel. Washington, U.S. Govt. print. off., 1921. 8 p. illus. (Air service circular no. 262)

High efficiency air flow, by F. W. Caldwell and E. N. Fales. Journal of the American society of heating and ventilating engineers, New York, May 1920, v. 26, no. 4, p. 403-14. illus.

The Propeller testing laboratory of the army air service at McCook Field, by F. W. Caldwell. Aerial age, New York, Dec. 20, 1919, v. 10, no. 10, p. 365-70. illus.

Studies in high speed aerodynamic phenomena, by F. W. Caldwell and E. N. Fales. Automotive industries, Philadelphia, Pa., Aug. 28, 1919, v. 7, no. 2, p. 77-80. illus.

OHIO - WRIGHT FIELD

Calibration constant of Wright Field five-foot wind-tunnel, by D. M. Borden. Washington, U.S. Govt. print. off., 1930. 17 p. (Air corps information circular no. 643)

UNITED STATES - OHIO - WRIGHT FIELD

"Over the hump," by A. M. Jacobs. Popular aviation and aeronautics, New York, Feb. 1929, v. 4, no. 2, p. 15-18, 97. diagrs.

VIRGINIA - LANGLEY FIELD - N.A.C.A.

Industry inspects N.A.C.A. Aviation, New York, June 1939, v. 38, no. 6, p. 52-53.

Airplane speeds over 600 m.p.h. made possible by N.A.C.A. labs. American aviation, Washington, May 15, 1939, v. 2, no. 24, p. 1, 4.

Two N.A.C.A. wind tunnels dedicated; operators to work like "sandhogs." American aviation, Washington, May 15, 1939, v. 2, no. 24, p. 4.

Notes on the proceedings of the 1939 meeting of the aircraft industry with the National advisory committee for aeronautics. Journal of the aeronautical sciences, New York, May 1939, v. 6, no. 7, p. 299-301. illus. (Also Aero digest, New York, June 1939, v. 34, no. 6, p. 55-56, 136) (Abstract News-week, Dayton, Ohio, May 15, 1939, v. 13, p. 26)

Comparison of profile drag and boundary layer measurements obtained in flight and in full scale wind tunnel, by Harry J. Goett and Joseph Bicknell. Washington, 1939. 10 p. diagrs., illus., tables. (N.A.C.A. Technical notes no. 693)

N.A.C.A. wind tunnels. (In Aircraft year book for 1938. New York, Aeronautical chamber of commerce, inc., 1938. p. 101-109, 406. illus.)

An Electromagnetic balance for force measurement or current control, by Fred S. Eastman. Seattle, University of Washington, 1932. 29 p. illus. (Engineering experiment station bulletin no. 60)

Venturi wind tunnel number 1. Part II - Design, construction on tests of new tunnel propeller, by Frederick K. Kirsten and Robert C. Davis. Seattle, University of Washington, 1932. 26 p. diagrs., illus., tables. (Engineering experiment station bulletin no. 62)

Vacuum-tube control for electric wind tunnel balance, by Fred S. Eastman. Seattle, University of Washington, 1931. 16 p. illus. (Engineering experiment station bulletin no. 35)

Venturi wind tunnel number 1. Part I - Design, construction, calibration, by Frederick K. Kirsten, Harold L. Adams and Richard L. Stith. Seattle, University of Washington, 1931. 79 p. bibliog., diagrs., illus., tables. (Engineering experiment station bulletin no. 57)

The Wind balance in the Boeing aerodynamical laboratory at the University of Washington, by F. B. Farquharson. Seattle, University of Washington, 1926. 21 p. diagrs., illus. (Engineering experiment station bulletin no. 38)

UNITED STATES - GENERAL

Original wind tunnel of Wright brothers, by G. Brewer. U.S. Air services, Washington, Nov. 1938, v. 23, no. 11, p. 17-18. (Also Journal of the aeronautical sciences, New York, Jan. 1939, v. 6, no. 3, p. 120)

First large wind tunnel in America erected in Chicago. Aero and hydro, Chicago, May 3, 1931, v. 6, no. 5, p. 88. illus.

UNITED STATES - GENERAL

I Nuovi tunnel aerodinamici americani, di R. McKinnon Wood. Notiziario tecnico di aeronautica, Roma, Oct. 1930, v. 6, no. 10, p. 29-37. illus.

Miniature wind tunnel at the Sesqui. Aviation, New York, July 5, 1926, v. 21, no. 1, p. 21.

Wind tunnel test stations. Aviation, New York, Feb. 21, 1921, v. 10, no. 8, p. 235.

U.S.S.R.

L'Istituto centrale aero-idrodinamica di Mosca ed i suoi laboratori, di V. Alexandrov. L'Aerotecnica, Roma, June 1934, v. 14, no. 6, p. 724-41. diagrs., photos.

Wind power laboratory of the Central aero-hydrodynamical institute, by G. H. Sabinin. Moscow, Scientific technical department of the Supreme council of national economy, 1934. diagrs. (C.A.H.I. Transactions no. 164, p. 5-39)

Il Laboratorio aerodinamico N.E. Joukowsky di Mosca, di N. E. Joukowsky. L'Aerotecnica, Roma, Oct. 1932, v. 12, no. 10, p. 1361-76. diagrs., illus., tables.

Wind channel walls interference, by F. G. Glass. Moscow, Scientific technical department of the Supreme council of national economy, 1930. 23 p. (C.A.H.I. Transactions no. 55)

Description du tunnel plat du laboratoire aérodynamique de l'École impériale technique de Moscou, par N. E. Joukowsky. (In Aérodynamique. Paris, Gauthier Villars, 1916. p. 156-62. diagrs., illus.)

L'Institut aérodynamique de Koutchino, par Lucien Fournier. La Nature, Paris, 1909, v. 37, p. 133-41. illus.

Études du courant aérien artificiel dans un tube destiné à des expériences sur la résistance de l'air, par D. Riabouchinski. Bulletin de l'Institut aéronautique de Koutchino, St. Petersbourg, 1906, no. 1-3. (Also Nature, London, Apr. 25, 1907, v. 75, p. 609-10)
